Our teacher showed us how to do the movement. We are moving right and left. We are practicing together. We are having a lot of fun. My teacher's playing the drum. The students move to the sound of the drum, too. When my teacher taps the drum quickly, the students move quickly. When he taps the drum slowly, the students move slowly.

Pintos' is a painting by Bev Doolittle. A pinto is a name for a horse with a special colouring – white with brown spots or blotches. Pinto horses hide, or camouflage in brown rocks and white snow. Animals use camouflage to hide and stay safe. Camouflage means that the colours and patterns on an animal's body are the same as the colours and patterns of the place where the animal is hiding. If the camouflaged animal does not move, it is hard for other animals to see it.

Camouflage is a good way for a small animal to hide from the larger animals that want to eat it. Birds like to eat bugs, butterflies, frogs and snakes. Snakes like to eat mice, frogs and birds' eggs. A yellow flower is a good place for a yellow butterfly to hide. The stick insect is good at camouflage. Its body is the colour of dark – brown and green.
