5

Circle the letter corresponding to the correct answer.

**Part 1****Question****1**

Which of the following best defines heat?

- |   |   |
|---|---|
| A | The movement of energy from a warmer object to a cooler object        |
| B | Transfer of energy between two solid objects                          |
| C | Transfer of energy in moving gases or liquids                         |
| D | The energy that comes from a source in the form of waves or particles |

**Question****2**

Which of the following slows down or stops the flow of electrical current?

**Copper****Silver****Gold****Wood**

- |   |        |
|---|--------|
| A | Copper |
| B | Silver |
| C | Gold   |
| D | Wood   |

3

**Question**

Which of the following is considered a living natural resource?

Metal

Soil

Water

Plant

A Plant

B Metal

C Soil

D Water

Question

4

Which of the following is the source of solar energy that is used to produce electricity?

A Sun

B Air

C Water

D Wind

**Question**

5

The figure below shows the types of energy. Which type of energy does letter (X) refer to?

- |   |                   |
|---|-------------------|
| A | Sound energy      |
| B | Wind energy       |
| C | Geothermal energy |
| D | Nuclear energy    |

**Question**

6

Which of the following is a renewable resource of energy?

- |   |             |
|---|-------------|
| A | Wood        |
| B | Oil         |
| C | Natural gas |
| D | Coal        |

## Part 2

Question

7

Which of the following best describes how does energy change in an electric bulb?

Chemical to thermal energy

Electrical to light energy

Electrical to chemical energy

Thermal to sound energy

Question

8

Which of the following is a fossil fuel?

The coal

The battery

The wood

The uranium

**Question****9**

Which of the following best describes using hot water that lies deep inside earth to generate electricity?

**A**

Light energy

**B**

Nuclear energy

**C**

Geothermal energy

**D**

Sound energy

**Question****10**

Which of the following causes air or water pollution?

**A**

Burning biofuels

**B**

Wind power

**C**

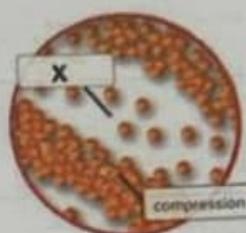

Hydroelectric energy

**D**

Solar energy

**Question****11**

Which part of the sound wave that has fewer particles is represented with the letter (X)?

- |   |             |
|---|-------------|
| A | Rarefaction |
| B | Peak        |
| C | Vibration   |
| D | Medium      |

**Question****12**

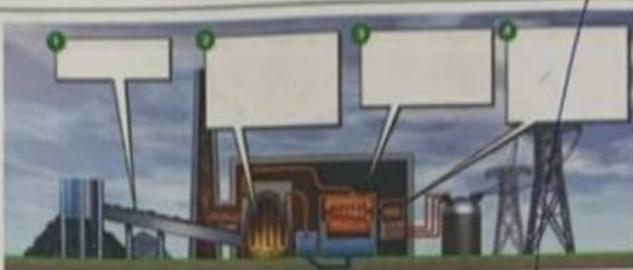

Based on the figure below, which of the following best describes how thermal energy is transferred?

- A Radiation
- B Convection
- C Conduction
- D Evaporation

**Question****13**

Based on the figure below, which step represents changing chemical energy to thermal energy?

**A**

2

**B**

3

**C**

4

**D**

1

**Question****14**

Which of the following best describes the below electric circuit with a bulb lights up?

**A**

Closed

**B**

Broken

**C**

Parallel

**D**

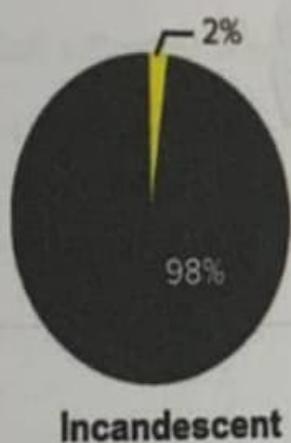

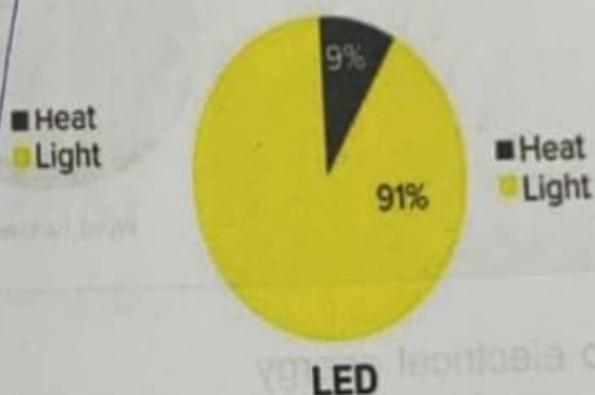

Open

**Question****15**

The figure below compares the percentages of heat and light energy produced from LED and incandescent light bulbs.

What is the percentage of the light that is produced from each of them?

**Incandescent****LED**

A LED 91% and incandescent 2%

B LED 9 % and incandescent 2%

C LED 98% and incandescent 91%

D LED 9% and incandescent 2%

**Question****16**

The figure below shows wind turbines. What kind of energy transformation does wind turbines do?

**Wind turbines**

A Motion into electrical energy

B Chemical energy into thermal energy

C Thermal energy into mechanical energy

D Chemical energy into kinetic energy

## Part 3

## Question

17

Use the adjacent figure to answer

the following questions.

- A. The electrical energy from  
the laptop is transformed into:

- .....energy
- .....energy

- B. While the teacher is talking to his student, he is transforming chemical energy from food into:

- .....energy

## Question

18

- A. Fill in the blanks in the adjacent table.

(1).....

(2).....

(3).....

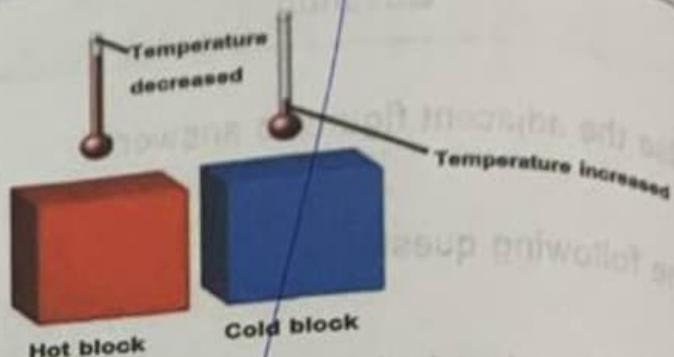

Station	Energy Transfer or Transformation?	Types of Energy
Wind-up toy	1	potential to kinetic and sound
Pom-pom launcher	transformation	potential to kinetic
Dropped ball	transformation	back and forth from potential to ..... 2
Marbles	transfer and transformation	kinetic to kinetic and 3

- B. What kind of energy is produced from burning wood and digesting food

19

## Question

- A. Explain why when the hot block is placed beside the cold block the temperature of the hot block decreased and the temperature of the cold block increased.

- B. What will happen when the two blocks reach the same temperature?

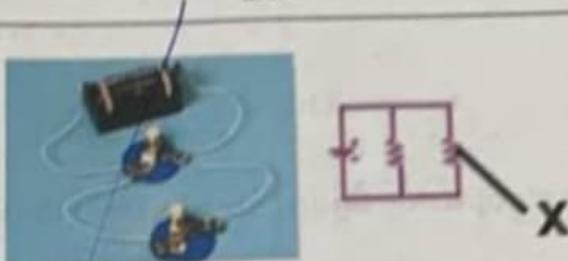

## Question

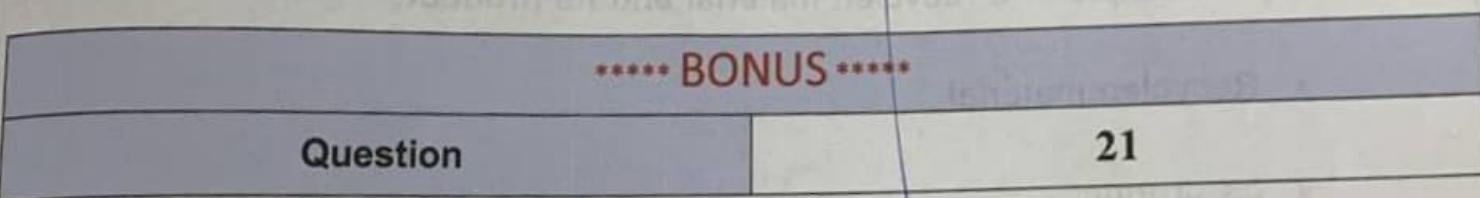

20

The adjacent figure shows an electric circuit.

- A. Label the letter (X).

- B. Identify the type of the electric circuit.

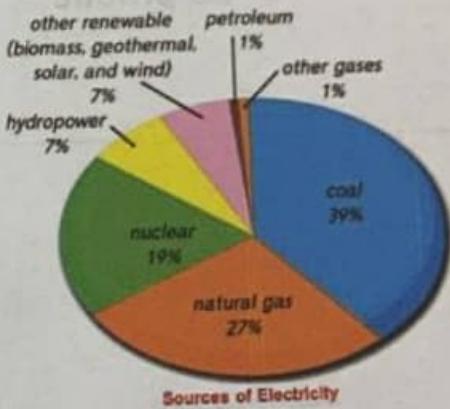

## Question

21

Use the adjacent figure to answer the below questions.

- A. What is the total percentage of renewable resources that are used to generate electricity?

- B. Which source is the highest source of electricity?

**..... BONUS .....**

Question

22

The adjacent figure shows the “three Rs “of conserving resources.

A. Label the letter (X).

B. Recycle is the process of converting waste materials into new products.

Give an example of a recycled material and its product.

- Recycled material .....
- its product .....

**End of questions**
