SCENARIO

In a historical moment, on September 25, 2019, Hazzaa Al Mansouri became the first Emirati astronaut to go to space.

In honor of the first UAE space mission. You are going to program your own **spaceship animation**. You will animate the return of Hazzaa's spaceship to earth.

Task 1 – Perform the following:

Create the spaceship animation. You have to do the following (30 marks):

Steps	Check List
1. Add earth sprite to the stage area.	<input type="checkbox"/>
2. Add spaceship sprite to stage area.	<input type="checkbox"/>
3. Add ' stars ' from space backdrop library.	<input type="checkbox"/>
4. Program spaceship to point to mouse pointer .	<input type="checkbox"/>
5. Program spaceship to bounce on edge .	<input type="checkbox"/>
6. Program spaceship to move two steps.	<input type="checkbox"/>
7. Program spaceship to play pop sound .	<input type="checkbox"/>
8. Spaceship program should repeat until touching earth.	<input type="checkbox"/>
9. Program earth to turn one degree.	<input type="checkbox"/>
10. Program earth to say, "Welcome Hazzaa", when spaceship touches earth.	<input type="checkbox"/>
11. Earth program should repeat forever .	<input type="checkbox"/>

Task 2: Answer the following:

A. Fill in the blanks (5 marks):

<p>receive</p> 	<p>variables</p> 	<p>decisions</p> 	<p>broadcast</p> 	<p>moving</p> 
--	--	--	---	---

- In computer programming, _____ are used to store data.
- Conditional statements are used for making _____.
- Animation is making drawings or objects look like they are _____.
- Sprites can send messages with _____ blocks and get messages with _____ blocks.

B. Match the blocks with their description (10 marks):

Block	Description
	Adds one to a variable
	Senses mouse pointer.
	Conditional statements.
	Add sound to program.
	Sends a message to all sprites and waits

C. Read the code below. Then answer the following question:

```
when space key pressed
repeat until answer = 3
  ask "What is 2+1?" and wait
  if answer = 3 then
    say "Correct" for 2 seconds
  else
    say "Wrong try again!" for 2 seconds
```

Read the statements and write True or False (5 marks):

Statements	True (T)/False (F)
1. The code runs when space key is pressed.	<input type="text"/>
2. “ Wrong try again ” message will show for 3 seconds .	<input type="text"/>
3. When user enters 3 , “ Correct ” message will show.	<input type="text"/>
4. The user input is saved in variable answer (answer).	<input type="text"/>
5. The code repeats until the user enters the value 3 .	<input type="text"/>
