Reading:

Read the passage and answer the questions by circling true or false:

Dinosaurs lived earth millions years ago. Some dinosaurs were small and others were huge. All dinosaurs laid eggs. Some ate meat, others ate leaves and plants. Scientists

used to think that all dinosaurs had scaly skin, like lizards. Now scientists have found fossils of dinosaurs which had feathers.

Scientists used to think that there were no poisonous dinosaurs.

Recently scientists discovered a dinosaur with teeth like a poisonous snake.

1-Dinosuars lived thousand years ago.	True	false
2-Some dinosaurs laid eggs.	True	false
3-Scientists used to think, dinosaurs had fur.	True	false
4-Scientists have found only bones.	True	false
5-Recently scientists discovered dinosaurs with poisonous bites.	True	false

Dinosaurs were in many types, shapes and sizes. Scientists believed that their extinction was a result of climate changes which they couldn't adapt to. Other believed that an asteroid hit the earth which led to a dramatic change of the climate. Some dinosaurs were carnivores. They were meat eater. However, some were herbivores. They were plant eaters. All dinosaurs were hatched from eggs. Some walked on two legs, while others walked on four legs. They had claws to catch food. They had spikes to fight. Some dinosaurs had horns, tail and wings. Eventually, scientists believed that birds are the closest relative to the dinosaurs.

- Choose the correct answer:

1. This text is mainly about:

a- Dinosaur discoveries

b- Dinosaur fossils

c- Dinosaur footprints

2. Some dinosaurs were carnivores. They

a- ate only meat.

b- ate only plants.

c- ate plants and meat.

3. Dinosaurs had spikes to

a- catch food

b- fight

c- fly
