Reading Practice 2 for grade 5 Bridge to success

Read the questions and choose the right answer.

Part 1

Ibn Nafis

Put your hand on your heart. Can you feel it pumping? Do you know what your heart is pumping around your body? That's right! it sending blood around your body. Now take a deep breath! How do you do this? That's right! with your lungs. You lungs and heart work together to send blood and oxygen around your body,ti keep you strong and healthy .Did you know that all this was discovered by a doctor called Ibn Nafis over 800years ago ? Ibn Nafis was born near Damascus, in 1210.He discovered how the heart pumped blood to the lungs, then around the rest of the body. At that time, other doctors didn't know this. They believed the information they read in very old books. Ibn Nafis taught them new ideas. They were amazed by the new information, and they used it to treat their patients better.

Part 2

Jane Goodall

For my presentation, I am going to talk about Jane Goodall. I think she is very nice because her job is nice. She is famous for her work with

chimpanzees in Africa. She watched their actions, and discovered many interesting things about them.

She was born in England in 1934. She lived in London. When she was a child, she liked watching the animals and birds in her garden. Jane really wanted to travel to Africa to look at the animals that lived in the forests. When she was older. Her dream came true and she worked with animals in Africa for many years.
