AL TARBIYAH AL NAMOUTHAJIYAH INTERNATIONAL SCHOOL

Subject	Science	Grade	5
Assessment Type	Worksheet	Title	Unit 3 Module 1 Lesson 1: Water distribution on Earth
:Teacher	Raneem Al Ibrahim	Date given	30/3/2022
:Student Name			

### A.Fill in the Blank s:

1. The water found on Earth makes up the \_\_\_\_\_.
2. About \_\_\_\_\_ percent of Earth's surface water is salt water found in oceans.
3. Only about \_\_\_\_\_ percent of Earth's water is fresh water.
4. Most of this fresh water is \_\_\_\_\_ in the form of permanent snow cover, glaciers, and ice caps.
5. A glacier is a thick sheet of \_\_\_\_\_.
6. This frozen water accounts for about \_\_\_\_\_ percent of Earth's fresh water.
7. Another \_\_\_\_\_ percent is groundwater.
8. \_\_\_\_\_ is water stored in the cracks and spaces between particles of soil and underground rocks.
9. Less than \_\_\_\_\_ percent is running water, such as rivers, and standing water, such as lakes.
10. A tiny bit of Earth's water is found in the atmosphere as \_\_\_\_\_.

## B. Answer the following questions:

1. Name the 3 main sources of usable fresh water.

---

---

---

2. Define reservoir.

---

---

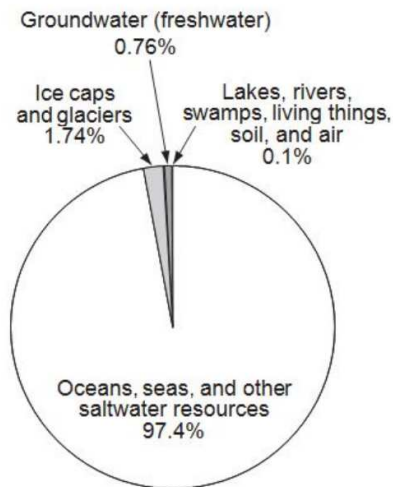

## C. True or false:

1. When water seeps into soil, it enters groundwater aquifers. ( )
2. As water flows through an aquifer, it reaches a layer of rock that it can move through. ( )
3. Fresh water builds up on top of the rocks. ( )
4. Fresh water can be reached by digging into the ground and taking water through a well. ( )
5. Running water provides a source of salt water for homes. ( )
6. Only running water is source of usable fresh water. ( )
7. A reservoir is an artificial lake built for storage of water. ( )
8. Storage is the process of water being stored under Earth's surface only. ( )

## D.:Multiple Choice

1. Less than 1 percent of Earth's freshwater is readily available for human and animal use. Where is the majority of the remaining freshwater located?
  - a. In ice caps and glaciers.
  - b. In the atmosphere.
  - c. In the oceans.
  - d. In lakes and rivers.
  
2. Lakes and rivers are part of the \_\_\_\_\_.
  - a. Geosphere.
  - b. Hydrosphere.
  - c. Atmosphere.
  - d. Biosphere.
  
3. Based on the graph below, what can you conclude about the water on Earth?

Distribution of Water on Earth

- a. 97.4 percent of the water on Earth is saltwater.
- b. 10 percent of the water on Earth is freshwater.
- c. 55 percent of the water on Earth is saltwater.
- d. 97.4 percent of the water on Earth is freshwater.

#### 4. Freshwater Source Percentages.

Source	Percentage (%)
Ground Ice and Permafrost	?
Lakes and Rivers	21.4
Groundwater	3.8
Other	5.8

Based on the table, what can you conclude about the percentage of ground ice and permafrost?

- a. The percentage of ground ice and permafrost is the same as groundwater.
- b. The percentage of ground ice and permafrost is greater than any other source.
- c. The percentage of ground ice and permafrost is less than any other source.
- d. The percentage of ground ice and permafrost is the same as lakes and rivers.

5. Around 97 percent of the water on Earth's surface is \_\_\_\_\_ water.

- a. Salt
- b. Fresh
- c. Mixed
- d. None
