Welcome to *Bridge to Success* Grade 5

Bridge to Success is a 12-grade course for learners of English as a Second Language (ESL). The 12 grades range from the beginning of cycle 1 to the end of cycle 3. The course has been designed to fulfil the requirements of the English as an International Language (EIL) National Learning Standards Unified Framework.

Bridge to Success Grade 5 consists of 12 thematic units of study, which include a range of activities, text types and objectives, split over three terms

The materials reflect the following principles:

- ***An Emirati focus, with an international perspective.*** Specifically developed for young learners throughout the United Arab Emirates, the themes, situations and literature covered by *Bridge to Success* strive to reflect the Emirati context and encourage learners' curiosity about the wider world. This fosters respect and interest in other cultures and leads to awareness of global citizenship.
- ***An enquiry-based, language-rich approach to learning.*** *Bridge to Success* engages children as active, creative learners. As learners participate in a wide variety of curriculum-based activities, they simultaneously acquire content knowledge, develop critical thinking skills and practise English language and literacy. The materials incorporate a 'learning to learn' approach, helping children acquire skills and strategies that will help them approach new learning situations with confidence.
- ***English for educational success.*** To meet the challenges of the future, children need to develop facility with both conversational and academic English. From the earliest stage, *Bridge to Success* addresses both these competencies. *Bridge to Success* presents authentic listening and reading texts, writing tasks, and end-of-unit projects similar to those learners might encounter in English-medium and international schools. Emphasis is placed on developing the listening, speaking, reading and writing skills learners will need to be successful in using authentic English-language classroom materials.

- ***Rich vocabulary development.*** Building a large and robust vocabulary is a cornerstone to success in both conversational and academic English. *Bridge to Success* exposes learners to a wide range of vocabulary. Many opportunities for revising these words and using them in personalised, meaningful ways are woven into the activities and lesson plans.
- ***Individualised learning.*** We approach learning in an individual way by both acknowledging the individual nature of the knowledge and background of each child and encouraging their specific input. We also provide for differentiated learning in the classroom by offering a range of activities of varying difficulty and guidance for tailoring activities to the needs of different learners. Detailed support for this is provided in the lesson plans in this book.
- ***Integrated assessment.*** Throughout the course, teachers informally assess their learners' understanding of language and concepts. The Teacher's Guide provides suggestions for extending or re-teaching language skills based on learners' demonstrated proficiency. An end-of-unit Review in the Learner's Book provides a simple-to-use evaluation measure: a quick progress check on learners' understanding of key ESL and early literacy skills. At the end of each unit, learners apply the skills and knowledge they have acquired as they work in groups to create and present a project. This provides teachers with an excellent performance assessment opportunity.

We hope that you and your learners will enjoy using these materials as much as we enjoyed developing them for you.

How to use *Bridge to Success*

A Components

Bridge to Success offers the following components:

- The **Learner's Book** provides the core input of the course and consists of 12 thematic units of study. Each unit contains 15 lessons developed around a unifying theme. The materials feature skills-building tasks for listening, reading, writing and speaking, with each unit developing a language focus. In addition, there is a strong vocabulary-building element to the course. Materials are aimed at the learner with all the experiences that they bring to the classroom. Learners are encouraged to see the moral and social values that exist in many of the course texts and find opportunities to reflect on these. Learners need to be exposed to many different forms of text topics and styles in order to develop the skills of assessing, interpreting and responding appropriately to content. Therefore the course aims to provide a variety of factual and fictional texts, dialogues and poetry, on a range of different topics, at the appropriate level.
- The **Audio CDs** include all the listening material needed for the Learner's Book and Activity Book. The listening material supports the Learner's Book with listening, pronunciation and phonics activities, as well as poems and read-along stories. We recommend that learners are encouraged to use the Audio CDs at home to practise the poems and stories, and to show their parents what they know.
- The **Activity Book** provides production, reinforcement and consolidation activities, as well as lead-in tasks to support the Learner's Book.
- The **Teacher's Guide** includes the lesson plans for each lesson, providing guidance about how the Learner's Book, Activity Book and Audio CDs can be used in the classroom. At the end of the Teacher's Guide, photocopiable activities (PCMs), cross-referenced in the lesson plans, provide extra support for selected lessons.
- A range of classroom resources, such as:
 - Word cards to be used throughout the course.

B Unit structure

Bridge to Success Grade 5 contains 12 units, spread over three terms. Each unit in the Grade 5 Learner's Book is structured as follows:

- A central topic or theme is developed over 15 lessons.
- Each core lesson uses the Learner's Book and Activity Book to develop learners' language skills, as well as explore and develop content knowledge.
- *My Learning* lessons provide an opportunity for consolidation and recycling of vocabulary and skills. These lessons can be used to informally assess learners' progress, address misconceptions and inform subsequent teaching strategies.

- A *Review* lesson provides an end-of-unit check of learning, giving the teacher a clear and regular view of learner progress.
- Each unit ends with two *Project* lessons, which provide an integrated skills focus. The first lesson provides learners with a challenge, which they will complete in preparation for the second lesson. In the second *Project* lesson, learners present their projects and are guided to reflect on their own learning.

C *Bridge to Success* features

Bridge to Success uses a range of features to guide and support teaching and learning. These are used throughout the Learner's Book, and may also be used in the Activity Book:

- **Language Tip:** A concise tip to help illustrate key language points. These can be used to model examples for learners, or to provide scaffolding and reinforcement where required.
- **Writing Tip:** A concise tip to support the development of writing skills, which can be used as a teaching item or reminder for learners of key writing principles.
- **Language Detective:** Keys and clues for learners to understand and use language points. These can be used for teaching and modelling to support learners in developing a robust understanding.
- **Use of English:** A tutorial of a grammar point, explaining when the point applies and providing modelled examples. These features often pre-teach language points, which learners then apply through a following activity.
- **Vocabulary:** A simple dictionary definition to help learners understand new vocabulary within an activity.
- **Amazing Fact:** An engaging fact to inspire learners, which can be used to prompt discussion.
- **Listening Strategy:** A pre-listening briefing that will help learners apply a range of different listening techniques.
- **Reading Strategy:** A pre-reading briefing that will help learners apply a range of different reading techniques.
- **Speaking Tip:** A concise tip to support learners in developing speaking skills, which can be used to pre-teach for speaking activities and referred to independently by learners during speaking activities.

D Lesson plans

The lesson plans include all you need to know in order to successfully teach using the new Learner's Book materials. These provide guidance for leading into and out of activities in the Learner's Book and Activity Book, as well as teacher-mediated activities.

The lesson plans contain a number of common elements to support you in understanding the lesson aims, and adapting your practice to suit learners' needs;

- **Learning objectives:** Skill-based high-level objectives that are being developed through the lesson.
- **Learning outcomes:** What learners will be able to achieve by the end of the lesson.
- **Link to prior learning:** How this lesson builds on prior knowledge and skills; this can be used to identify skills or knowledge to refresh learners' understanding at the start of the lesson.
- **21st Century Skills:** The 21st Century Skills or Themes developed through the lesson. Skills are generally developed through activities, whereas themes tend to be developed through the content of the lesson.
- **Key vocabulary and key expressions/structures:** Active language introduced, used or developed through this lesson.
- **Common misconceptions:** Highlights common errors or misconceptions; these can be targeted and addressed with intervention to ensure learners have a solid foundation.
- **Differentiation activities:** Adaptations for activities to suit learners who need more scaffolding or challenge.
- **Learning styles catered for:** The different learning styles addressed through this lesson plan. You can adapt these lessons using the Teaching Strategies to address different learning styles, depending on the learning preferences of your class.
- **Assessment for learning opportunities:** To be completed by the teacher, these identify different assessment for learning techniques, which may be applied in the lesson.
- **Standards/SLOs:** The principal SLOs from the UAE Ministry of Education EIL Framework that are addressed through this lesson.

E Customising your lessons

This Teacher's Guide provides a comprehensive set of lesson plans to support you in using the Learner's Book, Activity Book and accompanying Audio CDs. However, each teacher and each class is different, and we encourage you to reflect on what works for you and your learners, and to tailor lessons to ensure high-quality outcomes.

- Monitor your learners. If they need additional support for some elements, tailor the material to their needs.
- Bring as much 'real' material into the classroom as possible in order to create more interest for the lessons.
- Encourage learning/teaching/showing between classes, even of different age groups.
- Don't forget to draw on parental/carer support where possible.

When using the book, the following guidelines might be useful:

Before using the Learner's Book

- Use warm-up activities (for example, chants, TPR, vocabulary games, alphabet chant).

- Pre-teach and practise key language that learners will encounter in the Learner's Book and Audio CDs. (Try to make learning experiences concrete, interactive, motivating.)

While using the Learner's Book

- Keep learners engaged in an active way.
- Use the illustrations as a conversation starter – ask learners to name everything they see; play *I Spy*, etc.
- Vary the group dynamics in the lesson: for example, move from whole group response to individual response to pairwork.
- Provide opportunities for learners to ask questions, as well as to answer them.
- Encourage learners to act out the language in the lessons.
- Encourage learners to use language structures and vocabulary to talk about their own ideas, opinions and experiences.
- In class discussions, write the learners' ideas on class charts. You can refer back to these charts in later lessons.
- Adjust your reading and writing expectations and instructions to suit the literacy level of your learners.
- Use the *Teaching Strategies* section in this Teacher's Guide to adapt the different types of activity in the classroom and to customise feedback strategies.

Using the Activity Book and further suggestions

- Use the Activity Book pages related to the Learner's Book pages.
- Depending on the ability of the learners, use the stretch and support differentiation activities in the lesson plans to adapt the activities as required.
- Do a wrap-up activity or game at the end of every lesson.

F Assessment

We recommend that you take the time and opportunity to observe and monitor the progress and development of your learners. Many opportunities for informal assessment are provided through the *My Learning* lessons and end-of-unit projects as well as regular self-assessment opportunities.

At the beginning of the year, create individual portfolio folders to keep work that shows how the learners have been meeting the curriculum objectives. Use the portfolio to create a feeling of achievement and pride in learners about what they have achieved over the year. Keep this portfolio for parent-teacher meetings and send it home to show the parents/carers, either at the end of each term or the end of the year. You might also want to include a letter to parents/carers outlining what the learners have achieved over the year.

Assessment for learning

Assessment for learning is a teaching strategy based around continual informal assessment of learner understanding, which then informs subsequent teaching decisions.

Each lesson plan provides space and opportunities for you to apply assessment for learning techniques:

- **Observations:** Observing learners during tasks can help identify confidence, misconceptions, engagement and understanding of the task itself. This allows opportunities for individual interventions to address immediate learning needs.
- **Student self-assessment:** Self-assessments based around can-do statements provide an insight into learners' confidence of their own knowledge and skills, which can be used to address common or individual perceived weaknesses. It's important to combine self-assessment with other forms of formative assessment to ensure learners' confidence matches the accuracy of their understanding.
- **Oral questioning:** One of the simplest methods of eliciting feedback, oral questioning can help identify individual and group understanding. Questions may be directed at individual learners, groups of learners, or the whole class, although the teacher needs to make sure the feedback sessions are not dominated by the most confident learners. The feedback can inform whether learning points are reinforced, or whether the class is ready to move on.
- **Peer assessment:** Peer assessment develops learners' metacognition and their ability to articulate rules and conventions. The teacher should provide a model of peer assessment at the start of the activity to set out parameters and to demonstrate constructive feedback. Peer assessment can be incorporated in a variety of ways:
 - Combined with oral questioning, peers can assess whether a learner's answer is correct, and if not, be encouraged to provide a correct answer and – if relevant – an explanation of why this is correct. This technique can help learners internalise and deepen their understanding through articulating rules and conventions in their own words.
 - As a differentiated activity, pairing able learners with those who need more support. The more able learners can provide support, reinforcing the strength of their own understanding through articulation and explanation.
 - As an extension to presentations, where peers ask questions of the presenters. This can help teachers assess the depth of understanding of both the presenters and the audience, and identify learning points to reinforce as a result.
 - Written work may be peer assessed, providing that learners have a clear marking guide to follow. Activities requiring objective answers (for example, True/False or matching.) can be facilitated quite easily, whereas more open-ended writing tasks may require dictionaries and teacher input to ensure the peer assessment is successful.
- **Quizzes:** Quizzes provide an objective measure of learners' knowledge, and can be run as competitive activities (for example, *Backs to the board*, see *Teaching Strategies*), paper-based tasks (for example, an informal test) or online (for example, a multiple-choice test, with instant feedback). Consideration

needs to be given to the style of question (for example, free response, multiple-choice.) and the breadth of the domain tested (for example, whether the quiz tests a specific language point, the lessons' content, or broader). Regular use of quizzes can help build a data-informed picture of how the class is progressing, and whether there are areas of individual or collective weakness that need to be addressed.

- **Student presentation:** Presentations require learners to demonstrate their understanding and application of language. Misconceptions can be identified through directed questioning, which may be broadened out to the whole class through discussion, and addressed immediately through intervention.
- **Written work and feedback:** When learners submit written work, they should receive feedback as soon after submission as possible. Feedback should be encouraging, but identify and address errors and misconceptions. Common misconceptions or errors in the class can be addressed through whole-class teaching or activities, whereas individual errors should be addressed one-on-one through feedback.
- **Feedback:** Regular feedback is a key feature of assessment for learning and should be a part of each activity. An important function of feedback is to ensure learners acquire knowledge and skills correctly and accurately, so each lesson builds on solid foundations. Feedback can directly and informally reinforce learning points where required (for example, correcting common spelling errors, pronunciation issues and grammar misconceptions and during the activity), or include more formally structured teaching of specific points (for example, addressing a misconception or weakness common to the class).

In addition to the highlighted techniques in the lesson plans, the following strategies can be applied to embed assessment for learning in the classroom.

- Using objectives and outcomes for measurable learning or meeting set criteria. Where learning outcomes are clearly measurable (for example, learners will be able to write a sentence in the past simple and the past continuous tenses), activities that require learners to demonstrate these specific outcomes can be used to assess learners' mastery of the skill or knowledge.

G Common mistakes

The Cambridge English Corpus is a multi-billion word collection of written, spoken and learner texts; it is the largest of its kind in the world. The Corpus breaks down into several smaller corpora, including the Cambridge Learner Corpus, a unique 50 million word collection of exam scripts written by students all over the world. Analysis of this resource has identified a number of common misconceptions and errors made by Arabic learners of English at CEFR A1, A2 and B1.

Spelling errors

Doubling and clusters of vowels appear to present a particular challenge for Arabic-speaking learners – for example: *quiet, because, friend, people, restaurant, beautiful, country, receive*. Silent consonants (for example, *should, which*) and the silent *e* (for example, *there, before*) also appear in the list of frequently misspelled words.

Target Word	Errors (in order of frequency)
because	becouse, becaus, becuse, beacuse
friend	frind, freind
different	diffrent
people	pepole, people, peopel, peopl
interesting	intersting, intresting
restaurant	resturant
beautiful	beatiful, beutiful
there	ther
before	befor
with	withe, whit
country	contry, contre
their	thier
together	togather
like	lik
receive	recieve, recive
which	wich
wishes	weshes, wiches, wishes
important	importent
should	shoud,
tomorrow	tomorow, tommorow, tommorrow
always	alway, allways

Missing a or an

This error is seen most frequently when an adverb and adjective intervene between the needed indefinite and the noun. This error is most frequently preceded by *it is* or *it's*.

- Example error: *It's very nice place.*
Corrected: *It's a very nice place.*

Missing the

The is frequently missing before nouns. Common nouns associated with this problem include: *same, UK, countryside, centre, Internet, wedding, channel, cinema, city, museum, station, news, afternoon, same, weekend, USA, first, time, other*.

In addition, *the* is often missed before ordinals at the start of a sentence:

- Example error: *First thing I would like to tell you is that I love shopping.*
Corrected: *The first thing I would like to tell you is that I love shopping.*

Missing pronouns

It, you and *I* are the most frequently missing pronouns in the following instances:

- Missing *it* as an object pronoun: *My father gave me it when I was 13 years old.*
- Missing *you* as an object pronoun: *I want you to come with me.*
- Missing *I* as a subject pronoun: *I hope I see you soon.*

Missing conjunction

And is a common omission for Arabic learners.

Examples include:

- *It was full of flowers and green trees and there were places for cycling.*
- *There is a big sitting room, and there is a sofa, an armchair and a bookcase.*
- *My friend likes football and swimming.*

Missing be before adjectives in descriptions

The copula *be* presents a particular challenge as there is no *to be* in Arabic in the present tense. *Be* is the only significantly omitted verb, and because this error occurs with the present simple and progressive tenses, it needs particular attention from an early stage.

Frequent instances of this omission include:

- Missing *be* before adjectives in descriptions.
 - *I liked the competition because it was very interesting.*
 - *I will be very happy if you come.*
 - *The theatre is near my house*
- Before the prepositions for talking about when or where something is or happens.
 - *My house is next to the bus station, opposite the bank.*
 - *Dinner time is at 6 o'clock in the evening.*
- Before *-ing* forms in present continuous.
 - *The place I am staying in is amazing.*
 - *She is studying with me.*
 - *So we are planning to go to that park together.*

Verb agreement with be

As above, the lack of an equivalent for *to be* in the present tense in Arabic is likely the source of the frequency of errors around verb agreements involving *be*:

- Example error: *Two men was near his car.*
Corrected: *Two men were near his car.*
- Example error: *Young people is important in society.*
Corrected: *Young people are important in society.*

Using in instead of at or on, and vice versa

Using *in* instead of *at* is the most frequent wrong-preposition error, followed by using *in* instead of *on*.

The most frequent instances of *in* instead of *at* concerns the following:

- With clock time when talking about times or occasions.
Example error: *The weather is very good in this time of year.*
Corrected: *The weather is very good at this time of year.*

- With *house* and *home*.
Example error: *Can you come to dinner with me in my house?*
Corrected: *Can you come to dinner with me at my house?*
- With *work*, *college*, *school*, *university*.
Example error: *I met her in my work.*
Corrected: *I met her at my work.*
- In the phrase *at the weekend*.
Example error: *I really enjoyed shopping in the weekend.*
Corrected: *I really enjoyed shopping at the weekend.*
- With events, such as a *party*, *wedding*, *concert*.
Example error: *See you in the party.*
Corrected: *See you at the party.*

The most frequent instances of *in* instead of *on* concerns the following:

- With days of the week.
Example error: *I will visit you in Sunday at about 2 o'clock.*
Corrected: *I will visit you on Sunday at about 2 o'clock.*
- *TV*.
Example error: *Sometimes I see old serial dramas in TV.*
Corrected: *Sometimes I see old serial dramas on TV.*
- *Day*, *birthday*, *holiday*.
Example error: *We had a good time in this holiday.*
Corrected: *We had a good time on this holiday.*

Punctuation with apostrophes

Apostrophes are a common problem area for most groups of learners, not just learners whose first language is Arabic. The most frequent error types are listed below:

- Confusion between *I'm* and *I am*, resulting in *I am*.
Example error: *I am writing to tell you my news!*
Corrected: *I am writing to tell you my news!*
Or *I'm writing to tell you my news!*
- Confusion between *it's* and *its*.
Example error: *I've got a new phone. I like it's camera and it's screen.*
Corrected: *I've got a new phone. I like its camera and its screen.*
- Forming plural nouns with apostrophes, which may be a result of confusion with possessive 's.
Example error: *My friend's gave me a mobile, but my parent's gave me a computer.*
Corrected: *My friends gave me a mobile, but my parents gave me a computer.*
- Using *its* in place of *it's*.
Example error: *Its a big place and its nice as well.*
Corrected: *It's a big place and it's nice as well.*
- Possessive *s* with missing apostrophe.
Example error: *My friends name is Dalal.*
Corrected: *My friend's name is Dalal.*

Overuse of *it* as a pronoun between subject and verb

This is a particularly frequent error for Arabic students, although it is becoming more common among native speakers, especially in relative clauses.

- Example error: *You know I don't know if Oman's weather it will be very good.*
Corrected: *You know I don't know if Oman's weather will be very good.*
- Example error: *You can catch the bus that it stops across from our house.*
Corrected: *You can catch the bus that stops across from our house.*
- Example error: *The information you sent it to me by email was great.*
Corrected: *The information you sent to me by email was great.*

Over-long sentences

Sentence boundaries are a problem area for all learners (not just those with Arabic mother tongue), but not beginning a new sentence when required is by far the most frequent punctuation error of Arabic speakers. Run-on or overly long sentences are common, even at lower levels where learners' language normally limits them to simple short sentences. Learners may construct short sentences, but neglect punctuation to mark the start and end of sentences.

Teaching Strategies Grades 4–9

This section provides definitions for a range of different teaching strategies that can be used in the classroom, as well as information on the rationale for each activity.

Teacher-led strategies (direct instruction)

Guided reading

Learners are placed into groups of 6–8 according to reading knowledge and skills, in order to help them read and discuss texts with greater independence.

The teacher plays an active role in leading the learners through group reading sessions that:

- model reading processes
- demonstrate how to choose and read books of different genres
- apply prior reading experiences
- use vocabulary, syntax and phonics to develop understanding
- ask questions to establish comprehension
- deepen understanding
- support learners to reflect on their reading.

Guided writing

Learners are placed into groups of 6–8 according to writing ability and skills. The teacher leads and supports the learners through a variety of writing experiences to direct and develop their understanding of the process, purpose and forms of writing.

Guided writing strategies include:

- demonstrating ways to generate and analyse ideas
- describing and explaining characters and events
- recording and organising information
- editing and sharing work
- expanding the repertoire of techniques and types of writing
- building learners' confidence through writing in familiar and unfamiliar contexts.

Guided discovery

The teacher leads and supports the learners in the acquisition of skills and knowledge through modeling and step-by-step practise, until learners are able to apply the skills and knowledge independently.

Learners may be provided with an example of a language item in action, for example in a piece of text, and they are then supported and encouraged by the teacher to discover and summarise the rule themselves.

Guided listening

The teacher explicitly shares the purpose for the listening activity and provides focused instruction prior to reading the text or playing the audio.

- Learners are provided with a framework on which to organise their ideas; a way to record, share and value the ideas of others and a practical transfer of these skills to their independent work.

- Learners make notes while listening; the teacher pauses occasionally to discuss specific concepts and ideas with the learners.
- Learners pose questions, present ideas, make inferences/predictions/connections and reflect on peers' ideas.

Visual stimuli

Visual stimuli are an important component of individual learning materials, as well as of the classroom environment as a whole. Visual stimuli provoke discussion and engage learners in the lesson focus.

Learners are provided with visual stimuli such as images, cues, objects, or environments, to support them in making associations and connections in processing, memorising and recalling information.

Cloze

Cloze is used to assess literacy skills such as predicting meaning, developing vocabulary, applying prior knowledge and understanding textual information.

- Learners fill in or complete letters, words and phrases that are deliberately omitted from written or oral text.
- For support, learners may be separately provided with the letters, words and phrases that are required to complete the text.

Prompt

Learners are provided with prompts such as open-ended words, phrases or sentences to cue, focus, direct or produce thinking. Sentence starter prompts can encourage learners to complete an idea, deepen a question, expand on a response or plan further work. For support, the prompts may be longer and more structured. Prompts encourage learners 'confidence' especially when starting a speaking or writing activity. Examples of prompts include:

- 'Jamal went to the ...'
- 'On Tuesdays we ...'
- 'At school, Samia's favourite subject is ...'

Word cycle

The teacher introduces learners to new vocabulary, new topics or concepts using visual diagrams. The connections between and among words and concepts may also be identified and diagrammed (for example, using words, lines or lists), to review recently learned material, or assess knowledge of new concepts.

Word cycles can be used as a visual presentation method, or alternatively as a task to help learners form their own connections between words and concepts.

Flashcards

Flashcards are used for drill, practice and positive reinforcement. A typical flashcard has the question, term or issue on one side, and the answer, definition or related information on the other. For younger learners, flashcards may be larger, use a larger font and contain

less detail; as learners become older, flashcards may be smaller, use a smaller font and contain more detail.

The teacher uses a series of hand-held cards that are shown to learners often by flipping them over quickly as a technique to learn, memorise, or review information on the card.

Organised grouping strategies (cooperative)

Jigsaw

The jigsaw strategy uses the gradual culmination of smaller learner groups into larger groups to piece together information for a task.

- The teacher arranges the learners into small groups.
- Each small group or individual group member is assigned a different piece of information.
- Group members then join with members of other groups assigned the same piece of information, and research and/or share ideas about the information.
- Eventually, learners return to their original groups to piece together a clear picture of the topic at hand.

Mentoring

Learners are supported by an experienced or knowledgeable person who acts as a mentor. The term 'mentor' may refer to teacher-advisors, peer tutors and community mentors in a variety of settings.

- The teacher works with the mentor to create a support programme for the learner, which may be short-term or long-term depending on the learner's needs and the task requirements.
- The mentor provides one-on-one advice or training to support the learner in exploring ideas, taking risks, testing conclusions and obtaining feedback.

Peer practice

Learners work together in pairs or small groups (allocated by the teacher) to help each other to review, drill and rehearse to check knowledge, deepen understanding and develop skills.

Peer teaching

Learners (individuals or small groups) who are competent in a skill, or knowledgeable in a topic, act as 'experts' to teach what they know to their peers.

Round table

Learners write factual answers to a posed question (for example, 'What do you know about ...?', 'Who is famous for ...?') in order to generate and share a variety of information.

Learners can either answer a question sequentially on a single piece of paper that is passed around, on the board, or answer questions simultaneously on a separate piece of paper.

Interview

A person (the interviewer) engages in a conversation with another (the interviewee) in order to gather personal information and opinion, practical experience and advice. The person interviewed is often an expert or a person in the role of an expert. The person being

interviewed could be a teacher or learner in role, or an external expert.

Collaborative learning

Learners work together in pairs or small groups to solve a problem, complete a task or create a product. They participate in thoughtful discussion, which results in a more positive attitude about learning and each other by working together.

- Learners engage with one another and are responsible for making sure that everyone understands the task.
- The teacher facilitates collaborative learning by organising the learners into pairs or small groups that complement one another and by supporting the development of the group task.

Active strategies (activities)

Backs to the board

This is a competitive activity format that can be used to check vocabulary or knowledge.

- The teacher divides the class of learners into two or three groups.
- One learner from each group sits in a chair with their back to the board, facing their group.
- The teacher or a chosen learner writes a word on the board so that the learners sitting with their backs to the board cannot see the word.
- Each group provides hints to the learner from their group with their back to the board, who in turn attempt to guess the word.
- The first one to guess the word gets a point for their team.

Role-play

Learners act out or perform a particular role in order to explore and dramatise the thoughts, feelings and experiences of another person in a simulated situation.

- The role-play may be conducted between two learners, a small group or as a whole class led by the teacher.
- Role-play may be performed and presented to the whole class, where other learners may be invited to make comment on and analyse on the content.
- Some role-plays may be simple re-enactment, but role-play can also include learners' own development and interpretation of a given scenario.

Learning centres/stations

The teacher establishes physical locations, such as tables around the classroom, that are assigned for learners to explore topics, curriculum areas, resources and types of learning (for example, listening, reading, presentations).

The learning stations may contain problem-solving challenges or artifacts for discussion.

Learners may visit the learning stations as individuals, in pairs or in small groups.

Experiential learning

Experiential learning is the process of learning through experience, and is more specifically defined as 'learning through reflection on doing'.

It is vital that individuals are encouraged to directly involve themselves in the experience, and then to reflect on their experiences using analytic skills, in order that they gain a better understanding of the new knowledge and retain the information for a longer time.

Look-say-cover-write-check spelling strategy

Look-say-cover-write-check is a strategy used to help children learn their spellings. This is a useful method to teach learners so that they practise learning the spellings of words, but also so that they are testing themselves.

A learner is given a word to spell and:

- looks at it
- says the word
- covers it over with a piece of paper or their hand
- writes the spelling again next to the word
- uncovers the spelling to check if they have got it right.

Games

A game may be played using print, digital media, simulation or contest (competitive or cooperative) according to a clear set of rules in order to challenge and motivate learners to learn. This strategy is highly engaging, but all learners should understand the objectives and process of the game before playing.

Listening to stories/story time

The language used in stories is different from social spoken English. Listening to stories (audio recordings, teacher or peer readings) allows learners to access texts above the language they are able to engage with independently.

- Before listening to the story, the teacher should brief the learners on the objective or focus of the task.
- If learners are required to take notes, listen for keywords to answer questions, etc. this should also be briefed before listening starts.
- The teacher can pause or repeat sections to ask questions and support learners in following the story.

Reading diary

The use of a reading diary or a response journal supports learners to regularly write personal reactions to texts, activities and experiences in any subject area.

Learners' reactions may be formal or informal, and include exploring, analysing, questioning, interpreting and appreciating new ideas and experiences.

Reading diaries may be kept as a personal account shared between the learner and the teacher, or may be used to present ideas and reflections to the class.

Projects

Learners learn about a subject by working for an extended period of time on a project to investigate and respond to a complex question, challenge or problem. Project tasks contrast with paper-based, rote memorisation, or teacher-led instruction that simply presents established facts or portrays a smooth path to knowledge, by instead posing questions, problems or

scenarios. The project may be set by the teacher or may have initial input from the learners.

- The teacher should support the project by providing success criteria and access to resources that the learners may need to facilitate and develop their project.
- Projects may be presented to the class and learners may be asked to explain the process and outcome of their project.

Multimedia learning (video)

Learners may access ICT-based teaching resources provided by the teacher to facilitate learning, such as audio and video extracts used within lessons to demonstrate vocabulary and speaking. Learners may also use ICT-based resources, such as interactive software or using audio devices to record their own dialogues, to create projects and complete tasks.

Hot seating

The teacher decides on a specific conversation topic to frame the activity. This topic may be related to the current Learner's Book unit (for example, shopping, health care, holidays) or focused on a particular language structure being studied (for example, the past tense, conditionals or descriptive vocabulary).

- One learner volunteers, or is selected by the teacher to sit in the 'hot seat' chair at the front of the room.
- While in the hot seat, the learner has control of the class. They are responsible for selecting learners who have a question and addressing them directly by name, rather than looking at the teacher to facilitate the communication.
- The audience is responsible for listening to one another's questions and helping one another to ask appropriate questions, to incorporate pre-determined themes, vocabulary, or grammar structures as much as possible, and to avoid repetition of questions.
- The teacher acts as a facilitator and support to provide prompts, model dialogue and encourage the progression of the session.

Reading race

The teacher prepares questions about the details of a text; these questions should be objective and have one clear defined answer. This activity can work both before learners read a text and as a review activity when learners have finished the reading.

- The teacher organises learners into pairs with each learner having a copy of the text in front of them. Enough copies of the questions should be available for each pair.
- Learners are provided with the first question and race to find the correct answer. Once found, one partner should run their written answer to the teacher.
- If the answer is correct, learners are provided with the second question.
- The process is repeated until a group has answered all of the questions correctly.

This activity can be adapted to incorporate many versions of learners in pairs or small groups 'racing' one

another to read pieces of text and find information as guided by the teacher.

Running dictations

Through this activity learners practice reading, speaking, listening and writing; have to work together; and are also responsible for checking their own work.

- The teacher prepares two short texts, each taped to a wall.
- Learners are organised into pairs, with one learner being the writer and the other being the runner.
- The runner must run to the board where the first paragraph is displayed, read the text, run back to his or her partner, and repeat what he or she read.
- The writer's job is to listen to the runner and write down what is said. Usually it takes many trips to and from the board for the runner to relay the entire paragraph to the writer.
- When most groups are done, the writer can check the passage against what is displayed, and then roles are reversed and the second paragraph is used.

Find someone 'who'

The teacher tells the learners that they will ask each other questions. The goal is to ask everyone in class until the learners find someone who does that activity, has that characteristic or can answer the question.

- The teacher prepares a selection of 'find someone who ...' statements using vocabulary or concepts that relate to the current unit of study. For example, if you are teaching a unit on jobs: 'Find someone who can list tasks a farmer might have', or 'Find someone who can describe the job of a doctor'.
- The teacher creates a variety of statements so that it will be easy to find a person with some characteristics, but not so easy to find others.

Strategies to promote thinking and problem solving (analysis)

Brainstorming

Learners share and record questions, ideas and examples that come to mind (without judgement or censure) about a central idea, topic or problem. Brainstorming is often presented visually using colourful posters that can be created by learners in small groups and presented to the rest of the class.

Problem solving

Learners use a variety of reasoning skills (for example, inductive reasoning, deductive reasoning, exploring contrary examples) led by the teacher to engage a line of inquiry.

Problem-solving includes generating questions, making and carrying out a plan, testing hypotheses, constructing organised proofs and arguments, justifying conclusions and eventually resolving a problem or mystery.

Opinion forming

Learners may receive a quotation from a text (before it is read) that includes evidence for one side or the other

of an issue or argument. Learners share their quotations and their evolving opinions, with reasons and evidence to support them.

Alternatively the teacher makes a statement and encourages learners to form an opinion for or against the statement. Learners may be asked to move physically to opposing sides of the classroom to demonstrate their opinion. The teacher may then ask questions to encourage learners to justify and rationalise their opinions.

Reflection

Learners think deeply or carefully about information, an investigation or a problem in order to clarify their understanding in light of previous experience. Reflection may:

- include both formal and informal ways to think about the 'why' and 'how' of learning (for example, in a journal or response log)
- incorporate wait time before learners respond to a question
- require learners to complete a criteria-based checklist as a group following an activity.

Problem Based Learning (PBL)

- The teacher sets the learners a problem-based task.
- The learners are organised into small groups by the teacher and then brainstorm ideas. They identify what they know about the problem and what they don't know, but must learn, in order to solve the problem.
- Learners then develop an action plan for research, and discuss the topics and concepts researched, eventually coming to some agreement on the best resolution.
- The teacher acts as a facilitator to guide the learners through the process, ask relevant and probing questions and provide resources that the learners need to solve the problem-based task.

Challenge Based Learning (CBL)

CBL is a collaborative learning experience in which teachers and learners work together to learn about compelling issues, propose solutions to real problems and take action. The approach mirrors the 21st century workplace and requires learners to reflect on their learning, the impact of their actions and publish their solutions to a wide audience.

- The teacher works with the learners to identify the big idea.
- Learners identify guiding questions (what they need to know) and identify resources and activities to answer these.
- Learners research, document and develop a solution and then identify steps to carry out their plan.
- Learners implement their solutions, measure outcomes, reflect on what worked and determine progress made.
- Learners are encouraged to keep written, audio or video journals throughout the process and use these to share their projects with a wider audience.

Task Based Learning (TBL)

In a task based learning scenario, the lesson is based around the completion of a central task and the language studied is determined by what happens as the learners complete it. It enables more varied and natural exposure to language and a strong communicative approach.

- The teacher introduces the topic and gives the learners clear instructions on what they will need to do during the task. The teacher might provide some useful vocabulary to support the learners.
- The learners complete the task in pairs or groups whilst the teacher monitors and offers encouragement.
- The learners prepare a short oral or written report and feedback to the whole class on what happened during the task.
- The teacher highlights relevant parts of the report and uses this to inform areas for the learners to participate in further practice.

Resources	Main activity
Learner's Book page 17	<p>Over to you: Activity 1</p> <ol style="list-style-type: none"> 1. Ask learners: <i>What is your home like?</i> 2. Look at the pictures on the page and ask learners to describe what they can see. 3. Explain that they will now make a picture or booklet about their home, which will include features of their home and other important details. 4. Use the picture in the Learner's Book as an example, but explain that they may also use their own ideas. 5. Suggest that they could fold a piece of paper in half and draw the front of their house on the front cover. The details of the inside of their houses could be drawn on the inside of the leaflet. This could be set out as a floor plan or a cross sectional view if desired. 6. Remind learners to include details such as number of bedrooms, number of bathrooms, colours, special features and other important information. <p>Feedback</p> <p>Ask learners to present their ideas to the whole class.</p> <p>Answers</p> <p>Learners' own answers.</p> <p>Differentiation activities (Support):</p> <ol style="list-style-type: none"> 1. Ask concept-check questions to ensure learners have understood the meaning of <i>to build</i>. Tell them this structure is known as the <i>infinitive of purpose</i>. Work with the class to build up a list of sentences using the target structure. For example ask: <i>Where did you go yesterday?</i> (I went to the city centre.) <i>Why did you go there?</i> (To buy a T-shirt.) Write: <i>I went to the city centre to buy a T-shirt</i> on the board. Learners then use the infinitive of purpose to complete the sentences. Resources	Starter
	<ol style="list-style-type: none"> 1. Advise learners to work in pairs and make a verbal summary of the story they read and listened to in Lesson 9. 2. When one speaks, the other listens. 3. When the listener recognises their peer has omitted a detail, they raise a hand and they continue to tell the story. This continues until the whole story has been recapped.
Resources	Main activity
Learner's Book page 63	<p>Word study: Activity 1</p> <ol style="list-style-type: none"> 1. Learners copy the words from the box into their notebooks. 2. Check they understand the meanings. 3. Look at the first blue word, <i>large</i>, in line 2 and encourage learners to predict the meaning by looking at the whole sentence and the picture of the ostrich, before looking for the synonym in the word box. 4. Learners use these strategies to match the other blue words. <p>Feedback</p> <p>Learners check their answers in their groups. See if they can replace the blue word in the story with the synonym.</p> <p>Answers</p> <p>large – big; quickly – fast; tale – story; knocking – hitting; tricked – fooled; tiny – small; foolish – stupid</p>
Learner's Book page 63	<p>Word study: Activity 2</p> <ol style="list-style-type: none"> 1. Focus on the sentences and check learners understand them. 2. Activity Book page 49	Activity 2 1. Direct learners' attention to the pictures. 2. Learners match each picture with a verb of movement. Feedback Peer correction for content and spelling, followed by whole class feedback. Answers 1 run; 2 march; 3 race; 4 run at; 5 come down; 6 fly Differentiation activities (Support): 1. Learners practise miming these words for peers in their group to guess. Differentiation activities (Stretch): 1. Learners draw pictures to describe other verbs of movement that they know. 2. They then share with their peers, who guess the verb for each picture.
Learner's Book page 63	Values: Activity 3 1. Discuss the meaning of the word <i>jealous</i> . 2. Ask learners if they have ever felt jealous of someone. Why? Discuss situations where learners of this age might feel jealous. 3. Ask learners what they think is the best advice to take. For each point, learners discuss in pairs why the advice given is good or bad. 4. Learners then share their opinions in groups. Feedback Whole-class final feedback. Differentiation activities (Support): 1. Learners record new vocabulary with pictures to help identify the words in their exercise book. Differentiation activities (Stretch): 1. Learners write about a situation where they felt jealous, or someone felt jealous of them. Explain who felt jealous of whom, why and if/how they overcame these feelings.
Resources	Plenary 1. Ask learners what they have enjoyed talking about most in this lesson. 2. Ask them what they can do when they leave to brighten someone's day, for example, smiling at someone, holding a door open, tidying their room to help their parents.

Resources	Starter
Learner's Book page 77	<ol style="list-style-type: none"> Show the picture of Ibn Battuta and ask learners to describe what he looks like. Remind them to use some of the vocabulary that they learned in Lessons 1 and 2. Ask the questions in <i>Talk About it: Activity 1</i>. Encourage learners to make statements about their opinions.
Resources	Main activity
Learner's Book page 77	<p>Read: Activity 2</p> <ol style="list-style-type: none"> Learners read the first part of the <i>Fact file</i> and check to see if their answers for Activity 1 were correct. They then look at the questions at the bottom of the page and answer these by referring back to the text. <p>Feedback</p> <p>Ask learners to put up their hands to volunteer their answers for each of the questions below. For the third and fourth question, ask learners if they agree or not and ask those who do not agree to give their reasons.</p> <p>Answers</p> <p>Do you know who this is? Ibn Battuta. What did he do? He was a famous traveller. Does he look like an interesting man? Learners' own answers. Why do you think so or why do you not think so? They can then join other early finishers, and ask and answer the questions.

Learner's Book page 79	Activity 4 1. Learners work in pairs to find as many places on the map that were mentioned in the <i>Fact file</i> . 2. Give them three minutes for this task and encourage them to scan the text quickly to look for names. Feedback Ask learners how many places they found and ask them to indicate where they are on the map. <div style="background-color: #e0e0e0; padding: 5px; margin-top: 10px;">Answers</div> 1 Tangier; 2 Cairo; 3 Mecca; 4 Medina; 5 Mombasa; 6 Kilwa		
Activity Book page 60	Activity 1 1. Learners refer back to the <i>Fact file</i> again on pages 77–79 of the Learner's Book and choose four different parts to illustrate. 2. Encourage them to draw the pictures in sequence to show the correct order of events. 3. Learners can then write a word/sentence below each picture to explain what part of Ibn Battuta's journey they have chosen to illustrate. Feedback Learners can share their drawings and explain why they chose a particular aspect to illustrate.		
Resources	Plenary 1. Now that learners have had the time to read more about Ibn Battuta, ask if their opinion has changed from the beginning of the lesson. 2. If they did not think he was interesting at the beginning but do now, ask why their opinion has changed. Refer back to the Opinion forming strategy mentioned at the start of the lesson. 3. Ask learners who originally thought he was interesting to expand their explanations. 4. Ask learners what questions they would like to ask him if they could go back in time and meet him.

Do the same for <i>Elham's suitcase</i>. 3. Reinforce the concept by picking up items that belong to the learners and eliciting (<i>Ahmed</i>)'s pencil, (<i>Marwan</i>)'s book. 4. Now remove the names from the stick figures on the board and ask them what we can say now that we don't know the name. Elicit <i>The girl's suitcase</i> for each of the stick figures. 5. Write the examples from class on the board, clearly showing that the apostrophe is before the <i>s</i> in each case. 6. Now put the two stick figures together with just one suitcase and say, <i>Do they have a suitcase each or just one between them? How do we say this?</i> Elicit <i>The girls' suitcase</i> and write this on the board. Do the same with a couple of other similar examples and indicate clearly that the apostrophe is after the <i>s</i> in this case and ask why to check the concept. 7. Now write the two sentences on the board (<i>The girl's suitcase</i> and <i>The girls' suitcase</i>) and ask learners what the difference is. Resources	Starter
	<ol style="list-style-type: none"> 1. Ask learners what they can remember from Lessons 8–11. Write the answers on the board. 2. Give each learner a slip of paper. Ask them to write down a word or expression from one of the lessons that they feel very familiar with. They can use their books if required. 3. Ask learners to stand up and instruct them to mingle and give a definition of their word/expression to their peers for them to guess the word. If their classmates are correct with the answer, they move on. If not, they should try to explain to them what the word means. 4. Monitor and provide assistance where necessary. <p>Feedback Ask learners which were the easiest and most difficult words to guess.</p>

Activity Book page 63	Activity 3 1. Learners work alone to insert apostrophes where they think appropriate. 2. Learners check answers with a partner. Feedback Have the sentences written on the board and ask for volunteers to add the apostrophes where appropriate. <div style="background-color: #e0e0e0; padding: 5px;">Answers</div> 1 I want a book like Amir's . The pictures are great and the people's adventures are exciting. 2 I collected my parents' suitcases. Theirs were the heaviest of all. 3 Whose bag is this? I think it must be Elham's or Maryam's . 4 Has Ali gone on the children's day out? He has taken the girls' packed lunches. Differentiation activities (Support): 1. Learners can use their Learner's Book and Activity Book to support their search for information. Differentiation activities (Stretch): 1. Learners can develop additional review questions and swap these with a partner.
Activity Book page 63	Look what I can do! 1. Guide learners to the <i>Look what I can do!</i> statements. 2. Advise learners they can now read these and if they agree, put a tick in the box. 3. If they disagree, they should place an X in the box. They can then write a short sentence explaining why they can't do the statement. Feedback Self-reflection. Differentiation activities (Support): 1. Support with key vocabulary shown in the Learner's Book or written on the board if needed. Differentiation activities (Stretch): 1. Learners can search for and note down activities where they demonstrated these skills.
Resources	Plenary 1. Ask learners if they were surprised by how much they had learned. 2. Accept feedback whole class. 3. Ask learners to predict what they will learn in the next unit.

Place two chairs in front of the class facing away from the board and ask for a volunteer from each team to sit in the hot seat. Make sure they cannot see the words on the board. Circle one of the words and their teammates must call out definitions for this word until one of the learners in the hot seat provides the word. The winning team gets a point. Play again with the same two learners. After every two words, ask the learners in the chairs to choose one of their teammates to replace them. Play for a few more minutes. The group with the most points is the winner. Ask learners to bring in their graded reader for the next lesson.

Learning objectives: Reading: To read about school holiday activities we do indoors and outdoors. Listening: To listen to a radio interview about long school holidays. Speaking: To talk about long school holidays and to agree/disagree with peers. Writing: To write a list of things they like and dislike about long school holidays.		Learning outcomes: By the end of the lesson, learners will be able to ... <ul style="list-style-type: none"> • talk about long school holidays • compare their ideas with peers • use the language of agreement/disagreement to express themselves.
Link to prior learning: <ul style="list-style-type: none"> • Present simple • Past simple • Present perfect for past experiences • Talking about likes and dislikes • Holiday activities 21st Century Skills: <ul style="list-style-type: none"> • Critical Thinking and Problem Solving: Introduce the concept of how to be a critical thinker, as it applies to the concepts associated with learning a language – speaking, listening, reading, and writing. 		
Key vocabulary: Holiday activities; <i>indoors</i> ; <i>outdoors</i> Key expressions/structures: Agreeing and disagreeing: <i>I agree, I don't agree, I see what you mean, but I don't really agree, Me too</i>		
Common misconceptions for learners, ways of identifying these and techniques for addressing these misconceptions: <ul style="list-style-type: none"> • It can sometimes be challenging for learners to recognise and use similar lexical chunks; for example, <i>agree</i> is used repeatedly. To help learners with the language of agreement, exaggerate your facial expressions to show degrees of agreement/disagreement. Encourage learners to do the same.

UNIT 6 LESSON 2 TASKS/ACTIVITIES

Please also refer to the *Teaching Strategies* section of the Teacher's Guide (pages 6 to 10).

Resources	Starter
	<ol style="list-style-type: none"> 1. Ask learners to make a circle facing each other. 2. Ask them to say one sentence about an activity they could do during school holidays. 3. Encourage learners to try not to repeat the activities. 4. Encourage them to follow the previous learner's reply as quickly as possible.
Resources	Main Activity
Learner's Book page 86	<p>Word Study: Activity 1</p> <ol style="list-style-type: none"> 1. Write the headings <i>Indoors</i> and <i>Outdoors</i> on the board. 2. Ask learners for suggestions about where they do certain activities. Establish that some activities would fall under both headings. 3. Discuss whether they think there are differences between the UAE and other countries and what these might be. 4. Look at the activities in the box and discuss if learners would do the activities indoors, outdoors or both. <p>Feedback Open class feedback.</p> <p style="background-color: #d3d3d3; padding: 2px;">Answers</p> <p>Possible answers Indoors: <i>do jobs around the house, help in the shop</i> Outdoors: <i>go on a day trip, go to the park, cook on the campfire, go out on our bikes</i> Both: <i>spend time with our grandparents, go to sports camp</i></p>
Learner's Book page 86 Audio Track 33	<p>Listen: Activity 2</p> <ol style="list-style-type: none"> 1. Quickly revise the disadvantages of long school holidays that learners discussed in Lesson 1. 2. Learners listen to the audio and complete the second part of the interview. 3. Make sure they listen only for the specific information. <p>Feedback Open class feedback. When correcting the activity, ask learners questions such as: <i>Do you agree?</i></p> <p style="background-color: #d3d3d3; padding: 2px;">Answers</p> <p>1 at; 2 at; 3 of; 4 to; 5 to</p> <p>Differentiation activities (Support):</p> <ol style="list-style-type: none"> 1. You may choose to provide printed copies of the listening text for these learners or read it aloud, more slowly, to them. 2. Learners can then circle the missing information, before writing it down. <p>Differentiation activities (Stretch):</p> <ol style="list-style-type: none"> 1. For extra practice in talking about the school holidays, ask learners to practise the dialogue in groups of four, adding in the missing information. 2. They can take turns to swap roles.

<p>Learner's Book page 86</p>	<p>Word study: Activity 3</p> <ol style="list-style-type: none"> Learners read the second part of the interview (Activity 2) again and look for the phrases used for agreeing and disagreeing. Model the correct intonation and encourage learners to repeat. Explain that <i>I don't agree</i> can be used as a stand alone phrase and doesn't have to be preceded by <i>I see what you mean</i>, but that sometimes it can be a bit more tactful to use the sentence: <i>I see what you mean, but I don't really agree</i>. Explain that the longer option is often used when someone agrees with part of what is said, but then offers a slightly different opinion. Ensure that learners understand that either is acceptable and practise saying both. <p>Feedback</p> <p>Check in pairs, then open class.</p> <p>Answers</p> <p>Agree: <i>Me too. I agree.</i></p> <p>Disagree: <i>I see what you mean, but I don't really agree!</i></p>
<p>Learner's Book page 86</p>	<p>Talk: Activity 4</p> <ol style="list-style-type: none"> Discuss the good and bad things about the long school holidays. Learners work in pairs and write down three things that they like and one that they don't like about long school holidays. Demonstrate the activity with an example. Ask a learner to share one of their examples and ask the class for their reactions, using: <i>Me too; I agree; I don't agree; I see what you mean, but I don't agree.</i> Monitor and support as you circulate. <p>Feedback</p> <p>This will take place during the activity. Learners can swap partners, if time allows, and share ideas with other learners to compare their opinions.</p> <p>Answers</p> <p>Learners' own answers.</p> <p>Differentiation activities (Support):</p> <ol style="list-style-type: none"> Encourage learners to use full sentences with expression when speaking. Support them with planning their sentences first, either by helping them to make notes or writing them in full. Check intonation by encouraging learners to notice when the voice goes up/down and practise mirroring this. <p>Differentiation activities (Stretch):</p> <ol style="list-style-type: none"> Ask learners to make sentences to tell the class about themselves and their partners; for example: <i>I think the school holidays are too long, but Ahmed doesn't agree. We agree that we get too much homework.</i>
<p>Activity Book page 65</p>	<p>Use of English: Activity 1</p> <ol style="list-style-type: none"> Learners practise the new expressions for agreeing and disagreeing from the lesson by completing the dialogues. Make sure learners understand that they can use <i>Me too</i> twice and the other answers only once. Learners work individually. Monitor and support where needed. <p>Feedback</p> <p>Learners check answers in pairs and confer with the teacher if needed.</p>

	Answers		
	<p>1 I agree with you. 2 Me too. 3 I see what you mean, but I don't really agree. 4 Me too. 5 I don't agree.</p>		
	Differentiation activities (Support):		
	<p>1. Offer extra opportunities to practise the expressions: <i>Me too; I agree; I don't agree; I see what you mean, but I don't really agree</i>. Make up sentences and say them to learners to elicit one of the reactions; for example, <i>Learners should stay at school until 8pm</i>.</p>		
	Differentiation activities (Stretch):		
	<p>1. Ask learners to offer a reason for their answer and state why they agree/disagree.</p>		
Activity Book page 65	Challenge: Activity 2		
	<p>1. This activity provides further practice of the new expressions for agreeing and disagreeing. 2. Learners write their own responses to the statements in Activity 1. 3. This allows them to personalise their response and reflect on the language used in today's lesson.</p>		
Resources	Plenary		
	<p>1. Read the statements from the Activity Book, Activity 1 and encourage learners to respond using their own ideas from Activity 2. 2. You could do this as a chain activity, where you read the first statement, a learner provides a response and then reads the next statement for another learner to respond to. 3. This continues until all learners have had a go. 4. Ensure that you differentiate and stretch learners accordingly as some learners should be able to give reasons for their answers, but others will just agree or disagree with the statement.</p>

Common misconceptions for learners, ways of identifying these and techniques for addressing these misconceptions: <ul style="list-style-type: none"> • When talking about personal feelings, there is a general perception that some learners may become shy or embarrassed. To prevent this, use puppets. Either bring some to class or encourage learners to make their own. Use these during some of the speaking tasks. When speaking via a puppet, this depersonalisation allows learners to express themselves in language more easily.

UNIT 7 LESSON 11 TASKS/ACTIVITIES

Please also refer to the *Teaching Strategies* section of the Teacher's Guide (pages 6 to 10).

Resources	Starter
	<ol style="list-style-type: none"> 1. Discuss features of poems and the fact that some poems have rhyming words in them. 2. Play a rhyming game. Call out a word and encourage learners to respond with a word that rhymes. Possible words (covered previously in Unit 1) could be: <i>tall – wall; trees – bees; doors – floors; sun – run; bold – cold; said – head; house – mouse; dad – glad.</i>
Resources	Main Activity
Learner's Book page 110	<p>Talk: Activity 1</p> <ol style="list-style-type: none"> 1. Ask learners to read the poem out loud together with a partner (page 109). 2. What do they notice about the last words of the second and fourth line of each verse? 3. Monitor and listen to learners' pronunciation. <p>Feedback</p> <p>Praise the learners for their pronunciation and ask what they notice about the words at the end of the second and fourth lines.</p> <p style="background-color: #cccccc; padding: 2px;">Answers</p> <p>They sound the same/they rhyme.</p> <p>Differentiation activities (Support):</p> <ol style="list-style-type: none"> 1. One learner reads one word and their partner reads the word that rhymes. Assist if there are any difficulties with pronunciation.</p> <p style="background-color: #cccccc; padding: 2px;">Answers</p> <p>hair – bear; rings – things; possess – chess; cars – stars; great – wait</p>
Learner's Book page 110	<p>Write: Activity 3</p> <ol style="list-style-type: none"> 1. Focus on the unfinished sentences and the words in the box. 2. Ask learners to complete the poem with words from the box or with their own ideas. 3. Monitor and provide language support and/or correction if required. 4. Learners compare their poems together. <p>Feedback</p> <p>Ask for volunteers to read their poems out to the class.</p>

	<p>Answers</p> <p>Possible answers He/She's good at playing the oud, He/She likes ... painting pictures/riding horses/playing (musical instrument/sport), He/She's masterful at archery, And not bad at driving cars.</p> <p>Differentiation activities (Support): 1. To reduce the level of challenge and provide more language support, ask these learners to use only the words from the box.</p> <p>Differentiation activities (Stretch): 1. Ask these learners to use different endings to those given in the box and use rhyming words for lines two and four if possible.</p>
<p>Activity Book page 86</p>	<p>Vocabulary: Activity 1</p> <ol style="list-style-type: none"> 1. Direct learners to the picture of Machine Man and ask learners what words or expressions they could use to describe him. 2. Learning objectives: Speaking: To describe illnesses and symptoms. Listening: To listen to descriptions of illnesses for gist and specific detail. Reading: To read words related to illnesses and symptoms.		Learning outcomes: By the end of the lesson, learners will be able to ... <ul style="list-style-type: none"> • understand and use lexis and expressions related to health and illness • listen to descriptions of illnesses and match them to illustrations and words • identify symptoms of illnesses.
Link to prior learning: <ul style="list-style-type: none"> • Parts of the body • Illnesses 21st Century Skills: <ul style="list-style-type: none"> • Learning and Innovation: Introduce learning to develop, implement and communicate new ideas to others effectively in English. 		
Key vocabulary: Parts of the body: <i>head, ear, throat, stomach, nose</i> Common illnesses and symptoms: <i>sore throat, cold, cough, earache, fever, headache, stomachache, energy, voice, feel sick, stomach, hurt, blocked nose, sneeze</i> Key expressions/structures: <i>I've got ... /I feel ...</i>		
Common misconceptions for learners, ways of identifying these and techniques for addressing these misconceptions: <ul style="list-style-type: none"> • Learners may have problems grasping some of the concepts of the target language, especially any terms that may be new for them. Reinforce meaning by asking questions to check understanding. For example, <i>If I have a blocked nose, is it easy to breathe?</i> (No.) <i>Can I speak if I have lost my voice?</i> (No.) <i>Is it easy to eat when I have a sore throat?</i> (No.) <i>Why?</i> (Because it hurts.) • Learners may have some problems with individual sounds in words, particularly where there is no spelling–sound correlation; for example, <i>cough, ache</i>. Ensure that the pronunciation is modelled clearly and focus on any problematic issues that may arise in speaking activities in subsequent feedback stages.

Resources	Starter
	<ol style="list-style-type: none"> 1. Ask learners how they are feeling today and if they ever get ill. 2. What illnesses have they had? Elicit some names of illnesses; for example, <i>flu</i>, <i>a cold</i>, <i>a cough</i> and write them on the board. 3. Play a miming game where learners guess the illness that you are miming, chosen from one of the words on the board.

Learning objectives: Speaking: To talk about reasons for going to the doctor and some of the procedures. To discuss food preferences and allergies. Reading: To read a blog for gist and for specific information. Writing: To write answers at word level.		Learning outcomes: By the end of the lesson, learners will be able to ... <ul style="list-style-type: none"> • extend their knowledge of health-related vocabulary • read and identify a health blog and extract key information • share personal information about their likes, dislikes and allergies.

Key vocabulary: <i>vaccination, eye test, hearing test, prescription, blood test, stomachache, sick, itchy, allergy, skin rash, symptoms, advice</i> Key expressions/structures: Not applicable		
Common misconceptions for learners, ways of identifying these and techniques for addressing these misconceptions: <ul style="list-style-type: none"> • Learners may have problems grasping some of the concepts of the new vocabulary. Reinforce meaning by asking questions to check understanding. For example, <i>Who writes the prescription, the doctor or the patient?</i> (The doctor.) <i>What does he write on the prescription?</i> (The name of medicine.) <i>If I have a rash on my skin, do I feel good or bad?</i> (Bad.) <i>What does my skin look like?</i> (Red spots.), and so on. • Learners may have some difficulties with the word stress patterns in some of the longer words (for example, <i>intolerance, vaccination, prescription</i>) and the compound nouns (for example, <i>blood test</i>). Ensure that the pronunciation is modelled clearly and then learners are asked to repeat the stress pattern indicated on the board.

	<ol style="list-style-type: none"> 1. Start the lesson with a kinaesthetic activity which reviews the vocabulary encountered in the text in the previous lesson and which they will see again in this lesson. They may also need to use this lexis in the main writing task. (Suggested words: <i>try, stop, should, sounds, allergy</i> – start off with easier ones and progress to more difficult words.) 2. Put the class into two or three lines facing the board, one learner standing behind the other. 3. Give the learners standing at the top of the line a board pen. 4. Call out one of the words and give the learners 30 seconds to confer and decide how this word is spelled. 5. The learner at the top of each line races to the board and writes the first letter. He/She then returns to the line and passes the pen to the next learner who then writes the second letter. 6. This continues until the word has been completed and there is a winning team. 7. Repeat three or four more times. 8. At the end of the game, ask the learners if they can remember where they saw these words before. <i>What else can they remember about the writer of the letter and his problem?</i>

Learning objectives: Speaking: To discuss healthy eating. Listening: To listen to information about food groups and healthy eating for gist and specific detail. Reading: To read and complete notes about healthy eating. Writing: To write answers at word level.		Learning outcomes: By the end of the lesson, learners will be able to ... <ul style="list-style-type: none"> • identify which foods belong to different food groups and have a greater awareness of the benefits of eating a healthy, balanced diet • listen to information about food groups and healthy eating • complete a set of notes about healthy eating • understand the use of <i>should</i> for giving advice.

Key vocabulary: Food groups: <i>dairy, fruit and vegetables, bad fats and sweets, good fats and oils, grains and cereals, meat and fish; healthy, unhealthy, minerals, pasta, rice, bread, bones, teeth, nuts, body</i> Key expressions/structures: <i>You should eat ...</i> <i>You shouldn't eat ...</i>		
Common misconceptions for learners, ways of identifying these and techniques for addressing these misconceptions: <ul style="list-style-type: none"> • Learners may think that they need to understand every word in the listening extract the first time they listen. Advise them that they only need to have a general idea of the content at this stage and that they will be able to listen in more detail later. • Some learners may have problems with the meaning and pronunciation of <i>should</i> despite having been exposed to its usage previously. Concept check by asking learners whether we use <i>should</i> when we tell someone they must do something or when we tell them it's a good idea to do something (advice). Tell them that they will be practising this structure further in the subsequent lesson. Model the pronunciation and ask learners to repeat.

Please also refer to the *Teaching Strategies* section of the Teacher's Guide (pages 6 to 10).

Resources	Starter
	1. Ask learners what the most popular food is among people of their own age. What do they like eating? Is there anything they don't like eating? Is there anything they never eat?
Resources	Main Activity
Learner's Book page 121	Talk about it: Activity 1 1. Discuss the meaning of <i>healthy</i> and <i>unhealthy</i> (which learners met in Unit 3). 2. Ask if they can remember which foods are considered <i>healthy/unhealthy</i> . 3. Ask learners to talk in pairs and discuss if they think they eat a healthy diet. Encourage them to give reasons for their answers. 4. Ask them to think of three items of food that they think are healthy and three that they think are unhealthy. They do not need to write anything down at this stage. Feedback Ask for some volunteers to report back on their answers. Build a list of healthy and unhealthy food on the board. Answers Learners' own answers.
	Differentiation activities (Support): 1. Direct learners to Unit 3 to help them with the second part of the activity.
	Differentiation activities (Stretch): 1. For the second part of the activity, learners are asked to write down as many food items as they can within a given time limit.
Learner's Book page 121	Word study: Activity 2 1. Focus on the pictures. Ask learners to work in pairs and match the food groups to the pictures. 2. Learners will have been introduced to most of these food groups in Unit 3, so the only term that may need pre-teaching is <i>cereals</i> . Feedback 1. Ask volunteers to raise hands to offer answers. 2. Ask concept check questions to reinforce meaning if there were any difficulties with concepts. 3. Model the pronunciation of the words and ask learners to repeat them. 4. Ask the class which of the food groups are healthy and which are unhealthy. Answers 1 fruit and vegetables 2 good fats and oils 3 grains and cereals 4 dairy 5 bad fats and sweets 6 meat and fish

<p>Learner's Book page 121 Audio Track 48</p>	<p>Listen: Activity 3</p> <p>Teach</p> <ol style="list-style-type: none"> 1. This listening needs to be preceded by a teacher-led 'teach' stage in which key lexis is introduced. As always, introduce the easier concepts first. 2. Start by pointing to the pictures of the fish and meat (picture 6) in the Word study task and asking learners to put up their hands if they eat them. <i>What do we call somebody who never eats meat? Does anyone know?</i> Introduce the term 'vegetarian' and concept check for understanding. <i>So, does a vegetarian eat chicken?</i> As it is a multi-syllabic word, you will need to model and drill for pronunciation. 3. The term 'protein' was introduced in Unit 3 but will need revising. Show the learners the pictures in 6 again and remind them that they belong to a special food group. <i>It begins with 'P' and it describes food that helps us to grow. Can you remember?</i> Ask learners to look back at Unit 3 for guidance if necessary. 4. Revise <i>sugar</i> and introduce the term 'carbohydrate' by asking the learners what they remember about diabetes. <i>It is too much ____ in the blood. But we need to have some sugar ... why? For energy.</i> Point to picture number 3 in the Word study activity and tell them that these foods (grains and cereals) also provide energy but in a slower way and they have a special name. Introduce the term 'carbohydrate' and check understanding and focus on pronunciation as before. 5. Continue with the term 'calcium' in the same way by referring back to the appropriate food group (dairy) and eliciting why we should eat milk and cheese. (For our teeth and bones to be strong.) This can lead on to the introduction of the term 'mineral' and subsequently 'vitamin'. The need to check and reinforce understanding will very much depend on the learners' understanding of these concepts/knowledge of health and nutrition in other curriculum subjects. <p>Listen</p> <ol style="list-style-type: none"> 1. Ask learners to listen to the audio of Kaya's presentation on healthy eating and put the types of foods in the order that they hear them. Reassure them that they do not have to understand every word in order to complete the task. 2. Learners check answers together. <p>Feedback</p> <p>Ask for the class to vote on whether Kaya has a healthy diet? What helped them decide?</p> <p>Answers</p> <p>a protein – 4 b grains and cereals – 2 c fruit and vegetables – 1 d calcium – 3 e sweets, chocolates and cakes – 5</p>
<p>Activity Book page 95 Audio Track 11</p>	<p>Listen: Activity 1</p> <ol style="list-style-type: none"> 1. Tell learners to look at the sentences with a partner and decide if they are true or false. 2. Play the audio again for learners to check their answers. <p>Feedback</p> <p>Write the numbers 1–4 on the board and elicit the answers. Ask learners to correct the false statements.</p> <p>Answers</p> <p>1 T; 2 F; 3 T; 4 F</p>

	Differentiation activities (Support): 1. Stop and start the audio at the relevant parts in order to signal where the answers are.

Introduce the project by telling learners that they are going to conduct a survey to find out how healthy their classmates are. 2. Organise the class into groups of six and give each learner a number 1–6. 3. Allocate question number 1 to learner number 1, question number 2 to learner number 2, and so on. 4. Read through the instructions for the project with the class. 5. Elicit one or two examples of additional questions for each question. For example, <i>Which type of fruit do you eat most? When do you usually drink milk? In the morning with breakfast? Afternoon?</i> <p>Project 2</p> <ol style="list-style-type: none"> 1. Draw a picture of a globe, a doctor (and/or other pictures which represent health) and the date 7th April. Tell the learners that this is an important day worldwide every year. Can they guess what it is? 2. Give the learners some basic general facts about World Health Day and tell them what the topic is this year. 3. Depending on the topic and how familiar the learners are with it, either elicit what they already know about it or give them some basic information using visual support. 4. Go through the instructions for the project. 5. Divide learners into pairs or groups of three. 6. If you prefer, each group could make up their own survey.

Explain that learners must tick the appliances Ahmed mentions. 3. Then they look at the number allocated to each item and write the name of it on the correct writing line below. Feedback Call out the numbers and encourage learners to respond with the name of the appliance. Check the spelling by asking individuals to come to the board and write the words while the rest of the class calls out the letters.		
	Answers 1 television; 2 mobile phone; 3 fridge; 4 microwave; 5 cooker; 6 washing machine; 7 dishwasher		
	Differentiation activities (Support): 1. Remind the learners that the vocabulary in Activity 4 of the Learner’s Book will help them with the correct spelling.		
	Differentiation activities (Stretch): 1. Learners can draw a picture of a kitchen of the future. Using their imagination, encourage them to label and explain any new kitchen items they invent, for example, a solar-powered dust collecting robot that sweeps and washes the floor with no human assistance.		
Resources	Plenary 1. Ask learners to think about what has changed in their Emirate since the UAE was formed in 1971. 2. Ideas may include: equal access to education for boys and girls, stronger relationship with neighbouring emirates, oil boom, the number of foreigners living and working in the UAE, the road system, improvements in health and social care.

	<ol style="list-style-type: none"> 1. Tell learners that during this lesson they will review the skills and content they have learned throughout Unit 9. 2. Divide the class into two teams. Each team stand in a line in front of the board. 3. Give the two learners at the front of the two lines a board pen each. They must write a word they remember from the unit on the board and pass the board pen to the next person on their team. 4. The next learner must write a different word from Unit 9 on the board and then pass the board pen to the third person on their team and so on. 5. Learners cannot write a word that their team mates have already written before them. 6. Run the activity as long as appropriate, then stop the game and take the board pens away. Learner's Book page 145	<p>Talk about it: Activity 1</p> <ol style="list-style-type: none"> 1. Ask learners what they understand by the term <i>science</i>. Why is science important? Elicit answers and prompt about solving problems and improving lives. Explain that science has given us most of the things we have today. 2. Ask learners to start thinking about what the most important scientific discovery has been. Prompt with ideas such as medicines, electricity, understanding the world around us (the earth orbiting the sun, not the sun orbiting the earth, and so on). <p>Feedback</p> <p>Whole class discussion. Is it a verb (doing word), a noun (thing or person) or an adjective (describing word)?</i> Remind learners that if a word is introduced by <i>a</i> or <i>an</i> it is a noun.</p> <p>2. Establish that question 3 needs an adjective and question 5 needs a verb (introduced by <i>to</i>). Look at the list of words and establish there is just one verb and adjective.</p> <p>3. Now work through the different nouns: which key words in each sentence link to each noun? For example, in question 1 <i>work</i> and <i>science</i> link to <i>scientist</i>. Key vocabulary: <i>scientist, experiment, discovery, laboratory</i> Key expressions/structures: <i>... is important because ... ; It's/at ... o'clock.</i>		
Common misconceptions for learners, ways of identifying these and techniques for addressing these misconceptions: <ul style="list-style-type: none"> • Learners can become frustrated with the different ways of relating the time. They have to learn that 7.45 cannot just be said as <i>seven forty-five</i>, but can also be <i>quarter to eight</i>. Remind learners that, although it is fine for them to use only <i>seven forty-five</i> in speech themselves, they will certainly find that native English speakers use a mixture of the two, so it is important that they are able to recognise both. Practise using analogue clocks as well as digital clocks, and make it a game to see how many different ways learners can write down the same time.

Resources	Starter
Learner's Book page 146	<p>Talk: Activity 1</p> <ol style="list-style-type: none"> 1. Ask learners what they know about what scientists do. What do learners know about experiments? 2. Ask learners if they have any ideas about how science can be dangerous – start off discussions with a few ideas if necessary, for example, powerful things like electricity or explosives, things that explode if you mix them. How can you make it less dangerous? (for example, <i>Know what you are doing, have the right clothes, equipment</i>). 3. Encourage learners to discuss the questions in pairs and to share their ideas.
Resources	Main activity
Learner's Book page 146	<p>Read: Activity 2</p> <ol style="list-style-type: none"> 1. Read the passage out loud, modelling pronunciation for the class. Put learners into pairs and ask them to read the passage aloud to each other, alternating sentences. 2. Monitor and correct pronunciation as necessary. 3. Check for any unknown vocabulary. Prompt learners to work out unknown words from context, including the picture, and then appoint a learner to look up any words still unknown and report back to the class. 4. In pairs, ask learners to find the answers to the questions and then report back to the class. <p>Feedback</p> <p>Ask pairs to share their answers with the class. Use this as an opportunity to check their answers from Activity 1 as well. Ask learners to find the place in the text where the answers can be found.</p> <p>Answers</p> <ol style="list-style-type: none"> 1 Benjamin Franklin was from America. 2 He was interested in electricity. 3 It was dangerous because he might have been hit by lightning. Lightning is very strong and can make a fire when it hits things. <p>Differentiation activities (Support):</p> <ol style="list-style-type: none"> 1. Focus learners on questions 1 and 2. For question 1, learners are looking for a place name. For question 2, learners can use the key word <i>interested</i>. 2. For question 3, use a class discussion, rather than expecting a complete written answer. Follow up Activity 1 and talk about how this was dangerous. <p>Differentiation activities (Stretch):</p> <ol style="list-style-type: none"> 1. Learners answer the questions using full sentences. 2. Ask learners to write some complete sentences about other things that are both useful and dangerous (using ideas from activity 1). Write up a sample sentence on the board: <i>Electricity is useful but it is dangerous because it can start a fire or hurt people.</i>

<p>Learner's Book page 146 Audio Track 57</p>	<p>Listen: Activity 3</p> <ol style="list-style-type: none"> 1. Explain that learners are going to listen to a scientist describe his work. 2. If necessary, explain what a <i>sleep laboratory</i> is, but first see if learners can work it out. 3. Ask learners to look at the questions and think about what key words they need to listen out for (<i>work, a number, an adjective like 'easy' or 'hard', help</i>). 4. Play the audio once. Pause and play again. Ask learners if there is any vocabulary they don't understand. Play for a third time and ask learners if they can answer the questions. <p>Feedback</p> <p>Ask learners to volunteer answers and write them up on the board. Play the audio for a final time, pausing after each answer.</p> <p>Answers</p> <ol style="list-style-type: none"> 1 sleep laboratory 2 six 3 hard 4 make sure people have enough sleep to work safely.

Write up the sample from the Activity Book. If learners are confident, ask a volunteer to come up and draw in the hands on the clock face for 9.30. Remind learners about 'quarter past' and 'quarter to', and show the hand position on the analogue clock. 3. If everyone needs a refresher, do the Support activity below with the whole class. 4. Ask learners to write the times in words, following the example. <p>Feedback</p> <p>Ask learners to check each other's answers in pairs. Resources	Starter
Learner's Book page 147	<p>Talk about it: Activity 1</p> <ol style="list-style-type: none"> 1. Tell learners they are going to do an experiment today. Ask what experiments they have done at school in the past. What did they find out? 2. Prompt for experiences in science classes.
Resources	Main activity
Learner's Book page 147	<p>Listen and watch: Activity 2</p> <p>The purpose of this experiment is to test the effect of different length straws when making bird callers. In addition to giving learners the opportunity to follow instructions and practise asking permission, making requests and offers, this experiment will offer the opportunity to practise the use of the comparative and superlative in discussing the outcome.</p> <ol style="list-style-type: none"> 1. Tell learners that you are going to demonstrate part of the experiment that they will be doing. They need to listen as you read out the instructions and then watch as you follow them. (You could write these on the board or copy them and distribute if necessary.) 2. Start by listing all of the equipment needed on the board and check that learners understand all of the vocabulary. (Equipment: drinking straws, scissors.) 3. Learners can then point and match the pictures in their Learner's Book with the vocabulary in the box on page 147. 4. Work through the procedure below, demonstrating the steps and ensuring the learners understand what you are doing and why. <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <ol style="list-style-type: none"> 1 Squash the first straw flat. Cut the end into a V shape. 2 Put the pointed end into your mouth. Blow as hard as you can. 3 Ask learners what kind of a noise it makes (like a bird call). </div> <p>Feedback</p> <p>Ask learners to comment spontaneously on the type of noise made by the straw. Prompt with questions, it is high or low (if necessary demonstrate the difference between high and low noises with your voice). Is it loud or quiet?</p>
Learner's Book page 147	<p>Use of English: Activity 3</p> <ol style="list-style-type: none"> 1. Tell learners they will need to work as a team to complete the experiment. One person will need to be in charge of reading the instructions. Other team members should check that they are doing the right thing. 2. Read the <i>Use of English</i> box. 3. Within their teams for the experiment, ask the learners to take turns to ask permission and make offers and requests. Suggest that they use objects on the desk in front of them. (<i>Can I open the pencil case?/Can I pass you the pen?/Can I have the rubber?</i>) 4. Explain that they must use this vocabulary throughout the experiment to check the actions as they work through.

<p>Learner's Book page 147</p> <p>Activity Book page 114</p>	<p>Making predictions: Activity 4 (Activity Book: Activity 1)</p> <ol style="list-style-type: none"> 1. Ask learners to think about what might happen if the straw length changes. Can they justify an answer? (For example, a bigger musical instrument makes a lower noise than a small one, so a longer straw might make a lower noise.) 4. Ask learners to complete the sentence with their prediction for the experiment and then to write their predictions down in their Activity Book. 5. Take a vote about everyone's predictions and write the numbers of votes up on the board. <p>Feedback</p> <p>Whole class discussion. Ask prompting questions: <i>What do you think will happen? Give each group a set of equipment and a table to work on. 3. Encourage them to work as a team and to refer to the <i>Use of English</i> box if they need to be reminded of how to ask permission or to make offers and requests. 4. Tell each group to read through the instructions before starting and ensure that they understand what they need to do. 5. Check that there is no unknown vocabulary before groups start on the practical work. <p>Feedback</p> <p>Monitor learners' progress with the experiment and check that they are working well as a team. Offer feedback to each team individually, unless a common issue arises, in which case you can call the class back together. If any group is struggling to make a noise through their straws, make sure they are really flat. You can also cut them in half and do the experiment with shorter straws. It can be harder for people with small lungs to make the longer straws make the bird call sounds.</p>

Activity Book page 114	<p>Let's do it!: Activities 2 and Write: 3</p> <p>1. Ask learners to record their results in their Activity Books.</p> <p>2. Ask questions, for example: <i>Which noise was the highest?</i> Encourage learners to speak in full sentences when comparing the noises made by the straws.</p>		
Resources	<p>Plenary</p> <p>1. Bring the class back together and ask for each group to share their results. Are they the same? If not, why not? (Human error? Instructions not clear?) Remind the class that a good experiment is repeatable (it should get the same result every time). Is this repeatable? Check the result against the class prediction vote.</p> <p>2. Ask learners to look at the <i>Amazing fact</i> box at the end of Learner's Book page 148. Ask them to answer the question and reflect on what they have learned from the experiment.</p>

Tell each group to fill in the gaps to make a complete set of instructions for their experiment. 4. Learners may prefer to set their instructions out on pieces of paper if they feel they are likely to need more space, but they can use the Activity Book as a model. 5. Learners can work in pairs across the ability range. When they have agreed the content of each instruction, one person can write it up carefully while the other illustrates. They will need to regularly cross-check their work. <p>Feedback</p> <p>Monitor the learners, checking that each group is making progress with their version of the experiment, and that no-one is left out. Check that learners are using the imperative. Remind them that the illustration and the words must match each instruction. Choose a learner from a different group to read out each instruction. 3. Ask <i>Can I ... ?</i> questions about what you should do. Ask the class to agree whether or not you do each action. 4. Ensure you follow the instructions exactly – it is much more important to do this than it is to get the experiment right. <p>Feedback</p> <p>At the end, ask the class to reflect on what works and doesn't work in the instructions. If corrections are needed, write the correct instructions on the board. Ask learners to reflect on the differences between their group's instructions and the ones you chose. Before they progress with adding a defining relative clause, ask learners to picture the subject of the clause in their minds. Ask them to add detail to the picture, so they are quite clear (for example, <i>the children from Dubai</i> might be a group of children wearing badges saying 'Dubai'). Common misconceptions for learners, ways of identifying these and techniques for addressing these misconceptions: <ul style="list-style-type: none"> • Visualisation can be tricky for learners at this stage, as there is no right answer for the way to approach it. If learners struggle with the exercise, remind them that the purpose is to help them to check the sense of a piece of text. If necessary, write up two sentences on the board: <i>The cat sat on the mat. The cat sat under the mat.</i> Ask a learner to come up and draw a picture representing each sentence. Confirm that all the words in the sentence are spelled correctly, and that the grammar is correct. To confirm that something is wrong with the second sentence, it is helpful to visualise the meaning (cats are unlikely to sit under mats). This technique is helpful when approaching harder texts. If learners can picture what is happening, they can check whether it makes sense and more easily guess at unknown vocabulary.

Key vocabulary: <i>scientist</i> Key expressions/structures: ... <i>is more important than ... because ...</i>		
Common misconceptions for learners, ways of identifying these and techniques for addressing these misconceptions: <ul style="list-style-type: none"> • Learners may struggle with articulating why one scientist is more important than another. These are issues to which there is no right answer and learners may feel frustrated that they do not have the vocabulary to discuss issues in enough depth. Encourage them to use vocabulary from their own fact file and that used by other learners when describing their scientists. Remind them that it is better to say something simple, which they will learn to build on over time. • Learners may question the difference between doctor and professor. The title <i>doctor</i> does not necessarily mean that they work in medical science and can actually apply to anyone with a higher-level degree (PhD or similar) in their field. <i>Professor</i> is a title that indicates academic research leadership and this title is awarded by universities. A professor can also be a doctor.

	<ol style="list-style-type: none"> Write up a list of 15 words from the unit on the board: <i>experiment, new, invention, scientist, science, discover, medicine, laboratory, team, microscope, engineer, plant, earth, space, rocket.</i> Draw a 3 x 4 grid on the board. Tell learners to draw their own grids on the paper provided and choose 12 of the words to put in it. (N.B. if you are short of time, or if your learners are lower ability, you may prefer to make up some grids pre-populated with the words, so you can focus on the listening part of the activity, but remember that each grid needs to be different.) Explain that you will read out a passage about what they have studied so far in this unit. They will need to put an X across the words in their grid when they hear them. The first person to make a straight line between left and right (can be diagonal) wins and must shout 'Bingo'! Read out the passage: <i>This unit is about science. You did your own experiment to learn about sound. You read about scientists from history and around the world. You heard about scientists who work in a laboratory and in many other places. Scientists sometimes use a microscope to help them discover new information. They often work in a team with other types of scientist. For example, a space scientist and an engineer work together to make a new kind of rocket. Some scientists come up with inventions like new machines or medicines. Resources	Starter
	<ol style="list-style-type: none"> 1. Prepare enough strips of paper for half of the number of learners in your class. 2. Write a statement and the corresponding question tag on separate strips of paper. For example, write <i>Ahmed Zewail is a scientist</i> on one strip and <i>isn't he?</i> on another strip of paper. 3. Pair the learners and give each pair one strip of paper. They must mingle and say their phrase to other pairs of learners until they find their other half. 4. If the classroom layout does not permit mingling, copy and cut the strips and have groups of learners play Pelmanism at their tables.

Learner's Book page 176	<p>Choose a project: Stage 1</p> <ol style="list-style-type: none"> Explain to learners that they will work on one end-of-unit project. As Project 1 is more suited to learners who need more support, consider assigning projects instead of allowing learners to choose, but be careful how you do this. You might want to explain that in order to have a variety of projects you are giving each learner a special task just for them. Ideally, there should be an even number of learners on each project, but do not force a learner to work on a project if they are reluctant to do so. Project 1 is more suited to learners who need more support and who like to work in groups, while Project 2 is more suited to challenge stronger learners and/or learners who prefer to work alone.
Learner's Book page 176	<p>Project preparation: Stage 2</p> <p>Project 1: Special people</p> <ol style="list-style-type: none"> Learners work in groups of four or five. Give groups the necessary materials for the project. Tell learners to read and follow the steps of the project. Encourage them to use colours for the drawing section. <p>Project 2: Interview with a famous person</p> <ol style="list-style-type: none"> In groups, learners choose a famous person from their country they would like to interview. They can choose someone featured in previous lessons if they wish. In order to warm up the learners for the writing stage, direct learners to think about the questions they would like to ask. Make sure there is at least one question per interviewer. Prompt learners as needed; for example: <i>'What questions can you ask about this person's family? What can you ask if you want to know about their job?'</i> Tell learners to follow the steps outlined in the Learner's Book. This will help them organise their project. Learners work together to write the questions and research the answers. Encourage learners to practise the role-play before they perform in front of the class. <p>Feedback</p> <p>No open class feedback at this stage. Monitor and provide support as necessary. As each learner or group finishes, ask them to go back and check their work for spelling and punctuation. Another possibility is to ask learners to check each other's work.</p>

	Differentiation activities (Support): 1. When setting the task, allow these learners to look at the presentations and biographies they have read as a model.		
	Differentiation activities (Stretch): 1. (Project 2) Learners can prepare interviews with more than one famous person if they wish.		
Learner's Book page 176	Project preparation: Stage 3 1. Provide guidelines so that learners know how much they need to say/how long the presentation should be. The time allowed for each presentation depends on the number of learners in your class. 2. Remind learners of the language used to make questions, describe people and their achievements. 3. Ask them to rehearse their presentations. 4. Monitor, making a note of any issues with pronunciation. Feedback Focus on any problematic areas of pronunciation that may have arisen during the rehearsal stage.		
Resources	Plenary 1. Praise the learners for what they have achieved in the lesson. Discuss what they still need to do to be ready for their presentation.

UNIT 1

Track 2

Boy 1: I live in a bungalow, which has only got one floor. The kitchen, living room, dining room and office are at the front of the house, and all the bedrooms and the bathroom are at the back. I love it because I don't have to walk up and down the stairs all the time!

Boy 2: I live in a hut, with my family. It's a type of shelter made of mud, stones and wood. In my community all the families live in these types of shelters. We live very close together. I like where I live because there are lots of children to play with.

Boy 3: I live in an eco-home. It has a low impact on the environment because we use solar panels to heat our water and our house. I like it because it's very modern and comfortable.

Boy 4: I live in a nice villa with my family. Our neighbourhood is peaceful and quiet to live in. I love it because there's a park at the back and lots of my friends live in the same street.

Boy 5: I live very high up, in a high-rise flat on the 25th floor. I live with my family and cat. I like where I live because we have incredible views of Abu Dhabi and the sea.

Boy 6: I live in a small palace with my family in a green, leafy area of Dubai. I love where I live because it is very private and we can have large family celebrations with space for everyone to stay.

Track 3

Boy 1: This building is very big and it has lots of windows. What do you think it could be?

Boy 2: I think I can see shops, so it must be a shopping centre.

Boy 1: It's a very small building and it looks like a teapot! What do you think it could be?

Boy 2: I can see three petrol pumps in front of it, so it can't be a house.

Boy 1: Wow, this building is really strange! It's very sci-fi, isn't it? What do you think it could be?

Boy 2: Well, it looks like a spaceship to me, but perhaps it could be a museum.

Boy 1: This building must be in the country because we can see some green grass. What do you think it could be?

Boy 2: I think it might be a house, but it must be very small inside. Those rocks are enormous!

Boy 1: Wow! This building doesn't look real to me. What do you think it could be?

Boy 2: Well, it's very modern. I think it could be a library.

Track 4

Speaker: Children, be quiet, please.

Picture a is in Abu Dhabi. There are lots of windows. What kind of building do you think it is?

Boy 1: It must be a shopping centre.

Speaker: That's right. Well done!

Picture b is a small petrol station located in Zillah in the USA. It was built in 1922 and is believed to be the oldest petrol station in the country. It is strange because of its teapot-shaped office behind the petrol pumps.

Picture c is The Atomium monument in Brussels. What do you think it is?

Boy 2: It looks like a space station to me.

Speaker: Well, it's not a space station. It's an example of futuristic architecture and was built for the World Fair in 1958. It is now a museum and holds many exhibitions every year.

Picture d is a very strange house in Portugal. It has been built between two enormous rocks and if you look closely you can see the small window and door. Would you like to live in this house, Talal?

Boy 3: Oh, no! I'd probably get crushed by the big rocks!

Speaker: Picture e: This is the National Theatre of Beijing in China. It is a dome-shaped building, which is surrounded by an artificial lake. People say it looks like an egg floating on water!

Boy 1,2 and 3: Yes, it does!

Track 5

1

Girl 1: You're going to the Shopping Festival, aren't you, Faye?

Girl 2: Yes, I am. Your sister is getting dressed up, isn't she?

Girl 1: Yes, I think so. Oops, there's the bell. I've got to go to Maths class, now. See you later!

2

Boy 1: You've got a brother who plays for the local football team, haven't you?

Boy 2: Yes, I have. He's a striker and a good one too! He's playing at the Blue Box Sports Day. You play football, don't you?

Boy 1: No, not much. I prefer basketball. I've just been playing on the indoor court. Do you fancy doing some shooting practice?

Boy 2: OK then, let's go!

3

Girl 3: I'm going to the Outdoor spring performance this week.

Girl 4: Really? It starts at 7 o'clock, doesn't it?

Girl 3: Yes. Why don't you come? Your mum won't mind, will she?

Girl 4: I'll ask her tonight. There's a Yollah group performing, isn't there? I love that.

Girl 3: I know – I can't wait.

Track 6

Girl 1: You're going to the Shopping Festival, aren't you?

Girl 2: Your sister is getting dressed up, isn't she?

Boy 1: You play football, don't you?

Girl 3: It starts at 7 o'clock, doesn't it?

Track 7

There was an old woman who lived in a shoe,
She had so many children she didn't know what to do.
She gave them some soup along with some bread,
Then hugged them all tightly and sent them to bed.
She raised all her children,
With patience and love.
Never once did she give them,
A spank, shake or shove.
Her children all learned,
To be gentle toward others.
And good parents too,
When they became fathers and mothers.
From their days in the shoe,
They learned this about living:
Kindness, not force,
Is the gift that keeps giving.

Track 8

My old house is big and tall,
It's a villa with five windows on every wall.
Around the house are five wide trees,
And in each tree are fifty bees!
My old house has got squeaky doors,
That open onto creaking floors.
The roof lets in both rain and sun,
So we can have showers on the run.
Some say as an eco-home it's very bold,
I'd say only live there if you like the cold.
It has great charm it must be said,
But not when the cupboards smack your head (ouch!).
Many things live in my house,
Like the long-winged bats and the furry mouse.
But I live there too with my mum and dad,
And that very fact makes me very glad.

UNIT 2

Track 9

1

Boy 1: I live in Bangkok, in Thailand. There are a lot of cars in my city and the roads are very busy. That's why I go to school by tuk tuk. It's faster than walking and you don't get stuck in traffic jams! The tuk tuk driver can drive between cars, so we don't have to wait behind them. The only problem is that tuk tuks are open on each side, so you breathe in the traffic fumes!

2

Girl 1: In Manila, in the Philippines, where I live, we get to school by jeepney. Jeepneys have two benches in the back, so a lot of kids can travel at once. It's really good fun travelling with all my friends like this. But the ride is often very bumpy because the benches are quite high up, and sometimes it's a bit of a squash!

3

Boy 2: My dad takes me to school on his rickshaw. I live in Ho Chi Minh City, in Vietnam, and everybody here travels by rickshaw! I like it because I get to spend time on my own with my dad. But during the monsoon it can rain really hard and then it is not so much fun travelling by rickshaw. Even with our waterproof clothing, we still get wet!

4

Girl 2: I live on a small island in Hong Kong and I get the ferry to school every day. I like travelling by ferry because, when the weather is good, you can stand on the deck and look at the lovely views of the harbour. But in the winter it gets really cold, even if you sit inside in the cabin.

5

Boy 3: I live in Hiroshima in Japan and I go to school by tram. It's quite fast and it stops right outside my school, so I don't have to walk far at all. But it often gets really crowded and sometimes I don't get a seat. I have to hold on tight when it goes around corners, otherwise I fall over!

Track 10

Speaker 1: Hello, could you give us some information about places to visit in central London? We are looking for somewhere interesting to spend the afternoon ... and somewhere inside, I think, because it looks like it might rain.

Speaker 2: OK ... How about the Natural History Museum? There is something for everyone there ... amazing exhibitions and films and a wonderful wildlife garden, which you could visit if the rain stays away.

Speaker 1: That sounds perfect – how do we get there?

Speaker 2: I'll show you on this map. You take the underground to this station here - it's called South Kensington. From there you can walk to the museum. It's not very far – about five minutes ...

Speaker 1: And where's the nearest underground station from here?

Speaker 2: Go out of this office at the exit on the left. Then turn right and walk across the road towards the post office. Turn left just after the post office and walk up that street. The entrance to the underground station is on the right. It's called ...

Track 11

Noora was a beautiful little girl with dark brown eyes and hair as dark as the midnight sky. She lived with her family in a tent in a small village in the desert in Egypt, southwest of Cairo.

She often played with her friends, Karim and Yasmine. One day, they were walking along a sandy trail when they came to an area of trees. Noora saw something move off the side of the path. It was a furry rabbit. She wanted to follow it, but her mother had warned her never to leave the path; it was dangerous. Sometimes there were wild animals waiting in the bushes. But Noora wanted to catch the rabbit, so she left the path and followed it. Karim and Yasmine tried to call her back, but she continued to go after the rabbit. It hopped over a dead tree. It ran up a small hill and it jumped over a wide riverbed. While Noora was running after it, the rabbit jumped into some bushes and disappeared.

She sat down in the shade of a tree and looked around. Suddenly she heard a noise above her. She looked up and noticed lots of bees buzzing around her head. Noora didn't like bees. She jumped up and ran as fast as she could. She ran into the bushes and realised that she was lost. Where were Karim and Yasmine? She sat down on a rock and started to cry.

Then she heard a hissing sound. She looked at the ground and saw a big snake. Noora jumped up on top of the rock and watched the snake until it went away. She began to cry. She was very frightened.

She jumped off the rock and started running back to the riverbed. She was running along when she saw something moving. She thought it was the rabbit. Maybe, if she followed it again, it would take her back to Yasmine and Karim. She ran over to it, but saw it was a small fox with a big, bushy tail. It ran off into the bushes.

She walked along the path and then reached the riverbed.

Now Noora felt tired, hungry and afraid. The sun was setting below the horizon. She didn't want to be alone in the dark. She sat down in the sand, lay her head on her hands and fell asleep.

When she woke up, the rabbit was standing by her head and rubbing its nose against her cheek. Noora stood up slowly. The rabbit didn't run away. It wanted Noora to follow it. She walked slowly and followed the rabbit. Suddenly it stopped and Noora heard a voice, 'Noora. Where are you?' It was her father.

She called out, 'I'm here. I'm here.' Soon her father found her, and hugged her tightly. 'Where were you,

Noora? We've been worried about you. You know you aren't supposed to leave the path.'

'I know, Father. I am very sorry. I'll never leave it again.' She turned and looked for the rabbit. She saw it running off into the trees. She smiled, took her father's hand then walked back home.

Speaker 1: OK, young lady. You need to walk across the street and go straight on for two streets, then turn right. You'll see it on the left.

Speaker 1: Now, young man. Let's see ... go across the park. Keep going straight and take the second road on your right. Go straight on and it's the third building on your right.

Speaker 1: Hello Granny! Be careful with that! OK, now slowly go straight on. Don't turn left at the first road. Turn left at the third street, go straight over the roundabout and it is right in front of you. Now drive carefully!

UNIT 3

Track 14

Speaker 1: Let's write a list of the food and drink we need to buy.

Boy: OK. Well, there isn't any bread for sandwiches.

Speaker 1: So we need to buy three loaves of bread and two packets of cheese. How many cans of coconut water are there?

Boy: There are only a few left.

Speaker 1: Six cans of coconut water then.

Boy: We need to buy some water too. Four bottles should be enough.

Speaker 1: Is there any ice cream?

Boy: There are two tubs. One of chocolate and one of vanilla.

Speaker 1: Mmm ... That should be enough.

Boy: How about nuts?

Speaker 1: OK. Are four packets of nuts enough?

Boy: Yes, we don't need to buy any nuts.

Speaker 1: Anything else you can think of?

Boy: There's only a little orange juice left.

Speaker 1: OK ... and two cartons of orange juice. That's it then. Let's go shopping.

Track 16

Boy 1: Hey, Ahmed! Can you pass me the bottle of cola, please?

Boy 2: Here you are. Do you want some crisps?

Boy 1: Yes, please! Oh! There are only a few left.

Boy 2: Can you pass me a cheese sandwich, please?

Boy 1: Here you are. There aren't many left though.

Boy 2: There isn't much ice cream left. Do you want to share?

Boy 1: OK. I only want a little.

Track 17

Laila: At home we often eat fish and chicken. I like them both.

Salma: Yes, you're right that fish is nice, but I don't like chicken. I love eggs. They are my favourite.

Laila: I think the opposite. Eggs are horrible. Cheese is much nicer. What do you think about ice cream? I think it is delicious.

Salma: Me too, but I love to eat dates even more. I don't know why you prefer cheese to eggs. Cheese is not nice.

Laila: I don't know which menu to have. Shall we choose the same one?

Salma: I don't know. As long as I can have dates, I don't mind.

We have just received a warning from the National Weather Service for the north-western coast of the UAE. The severe storm has become much worse and wind speeds are building up fast. The storm is moving out to the east at about 40 mph. If you are in the area, you need to take cover. Dust and sandstorms can be very dangerous and are among nature's most violent storms. If you are caught in one, put a mask over your nose and mouth. If you don't have a mask, wrap a bandanna or some other piece of cloth around your nose and mouth. Sunglasses offer some protection from

blowing dust or sand, but airtight goggles are better. Look for shelter. Even a parked car will do, as long as it is off the road and not in danger of getting buried by sand. Reports are coming in to say that this storm looks like it is going to be active for several hours and there is going to be a lot of damage, so please take cover. We'll keep you posted ...

Track 20

The UAE is home to many beautiful animals, such as camels and cormorants. It is also home to dangerous scorpions and camel spiders. But did you know that some of these animals are now endangered? This means that large numbers are dying, fewer animals are having babies and soon there might not be any left at all. Animals, such as the Hawksbill turtle, Arabian leopard and the Arabian tahr are all examples of endangered animals.

Track 21

Animal specialist Dr Noor Al Amudin told Gulf News: 'Animal homes are lost as people use the land to build houses. They drive over land with four-wheel drives and catch animals to sell for money. All these things have endangered some animals in the UAE.'

The Arabian tahr is endangered because the places it lives have been used for building homes. For a long time, people have caught and killed Arabian Leopards for money. This has left leopard numbers very low.

It can be difficult to find an answer, but the country is working to look after and help endangered species. There are rules to stop people building houses on the places where these animals live. With protection, the Arabian leopard may live in peace and have more babies, to let the number of leopards grow again.

Dr. Al Amudin also stated that, 'Putting rubbish in the sea is killing sea animals, such as the Hawksbill turtle, because their home is no longer safe. If you are at the beach, take your rubbish home and help your local wildlife.'

Osama the ostrich was big and strong, with large wings that carried him over great distances. His wife had lots of children each year and he was well respected and feared. Like all powerful ones, he also had some enemies, especially Karim the cockerel. He was jealous of Osama's power of flight and the way he could run quickly over the vast desert without tiring. So he made a plan to hurt Osama and he told no-one about it except for his wife. He waited until he knew that Osama was going to the oasis to eat and drink, and he made sure that he got there before him. He held his wings close by his body, ruffled up his feathers and sat on the ground where the grass was rich and long.

When Osama had eaten a lot of grass and was in a good mood, Karim spoke to him. 'Hello, I want to tell you something that I think you should know. The other animals are wondering why a big, strong bird like you chooses to fly everywhere, instead of walking.' Osama looked at him with great surprise. How else could he get anywhere, he wondered. Karim continued, 'No-one else would dare to tell you these things, Osama, but walking really is best. Flying is something that any bird can do. It's common and boring. It's only strong birds like you and me who can get about by walking. It's a sign that you are a special bird.' Osama thought about it and replied, 'Hmm, perhaps you are right. I will have to talk about it with my wife this evening.' And off Osama went, marching across the desert to test Karim's words. His long legs carried him swiftly home to his wife.

The next day, the two birds met again. 'I have thought about it and decided that you were right,' Osama said. 'My wife and I took off our wings last night. We were sad to lose them, but my leg muscles are growing stronger already. I'll race you to that palm tree!' Karim laughed and laughed. 'I can't believe that it was so easy to trick you with that tale, Osama. Your brains must be as small as a baby bird's. But if you want to, I'll race you.'

Osama hurried across the sunbaked ground. Karim waited until Osama had nearly reached the palm tree, then he flew noisily through the air, coming down well ahead of Osama. 'Ha, ha, what a fool you are, Osama,' he cried. 'The other animals will never respect a bird who cannot fly.' Osama was angry. He ran at Karim, knocking him with his powerful legs, but Karim just flew away laughing. Osama sadly walked home to tell his wife how he had been tricked.

A whole year went by. Osama never said anything to Karim about losing his wings, and Karim did not know why. Osama's legs grew stronger and soon he was able to run as fast as the other could fly. One morning, Osama took his two largest children out with him, leaving his other 14 in their mother's care. He met up with Karim and his wife and their noisy family. 'Busy?' asked Osama. 'Busy!' exclaimed Karim, 'It's hard work all day long just trying to keep all of the children's stomachs full and they still look so tiny. We're trying to teach them to hunt for their own food, but we haven't had much luck so far.' 'Yes, I can see that,' replied Osama, 'But the trouble is that there are too many of them. They don't get a chance to grow big. We sent most of ours to live with other families. We thought that the only way to have strong, healthy chicks was to only keep the biggest. See how much bigger my two are than yours.'

Karim and his wife walked around Osama's chicks and spoke to each other quietly. Osama walked off with his chicks, laughing to himself.

The next day, he met Karim under the palm tree. 'I have taken your advice, Osama,' Karim said. 'Here are my two biggest chicks. The others have gone to live with their aunts and uncles. What do you think of this strong pair?' Osama laughed and laughed. 'What a fool you are,' he said. 'A bird's strength isn't in his wings, but in the number of his children. I am sorry for you, my friend, but perhaps it will teach you that cockerels are even more foolish than ostriches.'

And that is why ostriches have so many chicks, but cannot fly, and why cockerels cry so loudly every morning, to say sorry to their children for giving them away.

Track 25

Boy 1: Hanif, what do you want to do first? I'd like to feed the horses.

Boy 2: You should buy some hay to feed them with, Rahim. I'd like to visit the sea lions after that.

Boy 1: Can I borrow 15 dirhams to pay for the hay?

Boy 2: Yes, here you go.

Boy 1: Thank you. Be careful! Your bag is open and your books are falling out. You should zip it up.

Boy 2: Thanks! Let's hurry up and feed the horses. There is a sea lion show at 11.30 and I don't want to miss it.

Track 26

Speaker 1: There has been a terrible hurricane in Littletown today. Winds are still high, but people are starting to come back to their houses – or in some cases, what's left of their houses. Here is one homeowner. Hello, Mrs Robinson – what has happened to your house?

Speaker 2: What house? Everything has gone. I've got nothing left. It's terrible.

Speaker 1: You seem very upset – you look pale and exhausted.

Speaker 2: Yes, well, my house has just blown away. It's not a normal day, is it?

Speaker 1: What about your car?

Speaker 2: Well ... you're standing on what's left of my car. Everything else has disappeared.

Speaker 1: What about your family. Where are they?

Speaker 2: Well that's a strange thing. You see my husband has got an unusual hobby. He loves wild weather. So he's out in his truck taking photos of all the houses that are destroyed.

Speaker 1: Isn't that funny!

Speaker 2: No, it's not funny. It's ridiculous.

Boy: Did you see anyone on the beach this morning?

Adult: I saw a man on the beach during the storm. It was about 8 o'clock.

Boy: How long was he there?

Adult: He was on the beach for an hour.

Boy: What did he look like?

Adult: The man had green eyes. He was tall. He had a beard. He had long, straight hair and a short nose.

Track 29

1 Well, I was walking along the beach.

2 It was about 8 o'clock when I saw the man.

3 There was a bag next to him.

4 Our dog started barking.

5 Oh, and I nearly forgot - he had short nose.

Ibn Battuta decided that the best way to travel was by horse. He rode through the mountains of Morocco and on to Libya.

Near Tripoli they were attacked by camel raiders, but escaped unhurt. He also attended a wedding feast that lasted for a whole week.

By 1326, he reached Alexandria in Egypt. From Cairo, he travelled to the Red Sea, which took about 15 days. Here, he found that the local ruling family was fighting against the governor and had sunk some ships and

threatened further violence. Ibn Battuta was forced to go back to Cairo.

He continued his pilgrimage, through Syria, and spent Ramadan in Damascus. He joined a caravan of other pilgrims, to avoid travelling alone, because he was scared that someone might steal from him or hurt him. Travelling with other people meant he had friendship and protection. He continued on to Medina and then to Mecca where he completed Al Hajj.

On 17th November 1326, after a month spent in Mecca, Ibn Battuta joined another large caravan of pilgrims returning to Iraq. They travelled by night for about two weeks. They only stopped for a few minutes at a time to rest and eat before moving on again.

Around three years later, he travelled to Yemen and then on to Somalia. He then travelled by boat to Mombasa, and the next day he continued onwards to Tanzania and the town of Kilwa. Kilwa was famous for its gold trade and Ibn Battuta described it as one of the finest and most beautifully built towns he had seen. Any gold traders who tried to cheat on price were locked up, so the town was very safe.

He travelled for many more years, studied with other Muslims and met many kind and interesting people on his journey.

Girl 1: What shall we pack for the trip to our cousins' house?

Girl 2: I am taking all my best clothes. Do you think we will be staying in cousin Saeeda's room?

Girl 1: Yes, her room is much bigger than ours, so there will be plenty of space.

Girl 2: I can't wait to see Amir and Saeeda. Do you think they will come to the airport in uncle's car?

Girl 1: No, we have our suitcase, our parents' suitcase and four people. We won't all fit if our cousins come too!

Girl 2: I hope there will be a children's outing during our visit. Maybe to the wildlife park?

Reporter: What do you all do in your school holiday? We've invited some of you into the studio to find out what you all have in common ... and what's different about the way you spend your school holidays ...

So let's go first to Ana, from Brazil. Hi Ana!

Ana: Hi!

Reporter: Tell us something about how you spend your long school holidays ...

Ana: Well, I spend a lot of time with my grandparents because my mum and dad are at work during the day.

Reporter: OK, and what do you get up to?

Ana: Well, Grandma lets me bake cookies and we all go to the park with the dog. We go shopping too and sometimes go on a day trip to the seaside. Last year my sister and I did jobs around the house to earn extra pocket money.

Reporter: Thanks, Ana. And what about you, Luis?

Luis: We always go camping near the sea during our summer holidays.

Reporter: Really? What do you like about that?

Luis: I love being outside and eating food that we've cooked on the camp-fire. Last year it was very windy and we nearly set fire to the tent! It's really good fun though – we play football on the beach, go fishing and go swimming as well ...

Reporter: That's great. Now let's hear from someone else. Mohand, from Jordan. Tell us about your school holidays ...

Mohand: Well, for most of my holidays, I help in my mum and dad's shop.

Reporter: Ah, yes ... and how do you help out?

Mohand: I serve customers and tidy the shelves, go with my dad to the warehouse, that sort of thing ... It's great because I earn extra pocket money and it stops me getting bored at home!

Reporter: Ha, ha! And do you work there every day of the holidays?

Mohand: No, not every day. When I'm not there, I go to my cousin's house and we play football or go out on our bikes.

Reporter: Thanks, Mohand ... Now over to Carly ...

Carly: I love going to sports camp. I've been every year for the last three years.

Reporter: And what do you like about it?

Carly: It's really great – you get to do sports like football, basketball and swimming every day and you make lots of new friends. There is something to do all day every day and you never get bored.

Reporter: OK, thanks guys ... Now let's move on to ...

Track 33

Reporter: ... Now let's move on to another aspect of the school holidays ... I'd like to know if there's anything you don't like about the long holidays ... Who'd like to start? OK, Carly, off you go ...

Carly: I often get bored at home and sometimes I think that the holidays are just too long!

Mohand: Me too. When I'm at home, sometimes I run out of things to do.

Reporter: That's interesting and quite unexpected! What do the rest of you think?

Luis: I see what you mean but I don't really agree! I love the holidays so much that I don't want them to end. The only thing I don't like are holiday traffic jams.

Reporter: Thanks, Luis. Ana – would you like to have the last word?

Ana: I agree with Mohand and and Carly. I love school holidays, but sometimes I wish they were a bit shorter – then it wouldn't be so hard to go back to school afterwards!

Track 34

Girl 1: It says here that tents and cooking equipment are provided – I think we'll have to take everything else ourselves.

Girl 2: What do you think we'll need? What about clothes for a start?

Girl 1: Well, definitely a waterproof jacket and jeans ...

Girl 2: No, not jeans! They're too hot to walk in and take ages to dry if they get wet. Tracksuit bottoms are better because they're light and made of cotton.

Girl 1: Yes, you're right. OK, what about at night?

Girl 2: We'll definitely need sleeping bags to keep us warm in the tent – and a torch, because there'll be no electric light ...

Girl 1: Do you think we'll need things for eating? Plastic utensils like knives, forks, spoons, bowls, plates ...

Girl 2: I don't think so. Cooking equipment is provided, so I think the organisers will supply everything for us to eat with too ...

Girl 1: We're only allowed to take one backpack, so we can't take many things. What else are you going to take? What couldn't you live without for the week?

Girl 2: My MP3 player definitely! What about you?

Girl 1: I'm going to put some photos in my journal.

Track 35

Boy 1: Come on, what's the matter? Why don't you want to go? Mum's already paid for us to go ...

Boy 2: I know but I'm rubbish at sport! I'm not very good at football, or basketball, or hockey ...

Boy 1: That's OK. How about trying a new sport? ... Something you haven't done before ...

Boy 2: But what if I'm not very good ... ?

Boy 1: You don't know until you try. It says here that you can try a new sport. That means that there will be beginners' classes for all the sports. So everyone else in those classes will be a beginner too.

Boy 2: So does that mean that no-one in the classes has done the sport before?

Boy 1: Yes, so everyone has to start at the beginning. No-one is better than everyone else because everyone is a beginner! Let's join a class together. I'd like to learn something new too.

Boy 2: OK, that would be good. Why don't we do one of the martial arts classes ... like judo or karate? Let's try something different, something that's not a ball game!

Track 36

Which have you enjoyed the most? Which do you find easier?

Track 37

Part 1

Ben: I really don't want to start school again tomorrow.

Danny: Me neither.

Ben: The holidays have been great. I don't want them to end!

Tom: Me neither.

Ben: I keep thinking about tomorrow and going back to school again. I've a horrible feeling in my stomach and I feel a bit sick!

Danny: Me too!

Ben: I don't want to start a new class with that new teacher!

Tom: Me neither!

Ben: I liked our old class. I want to go back there!

Danny: Me too!

Ben: I'm going to tell my mum and dad that I'm not going to school tomorrow!

Tom: Me too!

Ben: What? You're going to tell my mum and dad that you're not going to school tomorrow?

Tom: Nooo ... ! Sorry ... it's just that I feel the same way and I've never told anyone before ... I always feel like this the day before going back to school after the holidays ...

Ben: Me too ...

Danny: Me too ...

Part 2

John: Hey, what's up? Oh, dear! What's the matter?

Ben: Nothing! Nothing at all!

Tom: Nooo ... nothing! We're great, aren't we?

John: No, you're not! I can tell ... I know what it is ... you're feeling nervous because you've got to go back to school tomorrow, aren't you?

Danny: No!

Tom: Well, actually, yeah ... you're right.

John: I thought so. Look, it's okay. Everyone feels like that the night before. I'm feeling a bit like that too ...

Ben: Really? But you're fourteen!

John: I know, but I still get that feeling even now. Everyone does! Look, I bet there are loads of kids, all over the country, who are feeling exactly the same way today.

Danny: Do you really think so?

John: Of course! Kids everywhere get this feeling, whatever their age. It's just that no-one admits it! And it's not just kids ...

Ben: You mean ... ?

John: Yes! Even adults get it too. Dad told me once that even he gets a bit nervous before he goes back to work after a holiday. He said that he thinks about the great big pile of work waiting for him on his desk ... all the people he has to deal with ... And he's 42!

Ben: Well, I suppose it's normal to feel like this if even adults get it ...

Tom: And big brothers ...

John: Of course it is! Think of all the good things too – there are good things about going back to school, you know. Try to think of some!

Danny: Well, it'll be really good to see all our friends again. It's been ages since we've seen most of them.

Tom: And the football season starts when we go back!

Track 38

Ben: I really don't want to start school again tomorrow.

Danny: Me neither.

Ben: The holidays have been great. I don't want them to end!

Tom: Me neither.

Ben: I keep thinking about tomorrow and going back to school again. I've a horrible feeling in my stomach and I feel a bit sick!

Speaker 1: What always surprises me about my granddaughter is the way in which she loves to take centre stage. She doesn't get nervous at all and seems quite at home speaking to lots of people.

Speaker 2: I just don't understand why he gets so angry. If we don't pass him the ball all the time he just stops playing and walks off the football field.

Speaker 3: I really admire my friend Aisha. She always works hard. She loves learning about new things and always has her head in a book. Needless to say she always gets top marks in class.

Speaker 4: Camilla is my best friend. She's such a kind, generous person. We share everything: our pencils, our pens, our secrets and our sweets and chocolates – of course!

Speaker 5: Come on Natasha! Why are you hiding? It's my friend, she's just saying hello to you.

Speaker 6: Cheng is a very tidy person. He always tidies up his bedroom and puts his food wrappers and empty bottles in the bin in the park.

Track 41

English teacher: Hello Bader, How are you today?

Bader: I'm fine thank you.

English teacher: Tell me about your family. Have you got any brothers or sisters?

Bader: Yes, Marwan, a younger brother who is a bit of a pain!

English teacher: Where were you born?

Bader: I'm from ... Sorry, what I meant to say was I was born in a small town called Dibba in the UAE.

English teacher: Tell me about yourself. What are you like?

Bader: Sorry, could you repeat that, please?

English teacher: Yes, of course. What are you like?

Bader: Well, I'm a confident person and I like to do things properly, although I don't think my mum would agree with my last point. I have a lot of friends and I make them laugh.

English teacher: Who are your best friends?

Bader: Well, my best friend is Majed, he's really good fun. We've been friends for as long as I can remember. We met when we were babies.

English teacher: What are you good at at school?

Bader: I don't think I'm good at many things to be honest. Well, Mr Al Maarwi would say I'm good at singing, but I don't agree with him at all. I'm good at drawing and I think I'm quite good at Mathematics too!

English teacher: Do you have a favourite sport?

Bader: No, I'm not good at any sport. Once, dad thought I was going to be a great rugby player, so he made me join the local team, but he was wrong, of course! I only played for two weeks before I left.

English teacher: What are your favourite things?

Bader: Well that has to be my big collection of computer games. I absolutely love playing them. Majed and I play quite a lot together. Then there's my collection of comics. I remember when Majed and I wrote our own comic strip, Zippy Racer.

Track 42

Hiro: Hello, my name's Hiro. What's yours?

Ben: Hi, I'm Ben. Where are you from?

Hiro: I'm from Tokyo. And you?

Ben: I'm from New York. Have you got any brothers or sisters?

Hiro: Yes, I've got an older brother. And you?

Ben: I'm an only child.

Hiro: Sorry, could you repeat that?

Ben: Yes, there's just me. I haven't got any brothers or sisters.

Hiro: Do you have a favourite sport?

Ben: Yes, I really like playing baseball and table tennis.

Hiro: Me too! Well, I'm not so keen on baseball, but I love playing table tennis!

Ben: What are you like?

Hiro: Well, I think I'm quite hard-working and cheerful, but my mum doesn't think so. She thinks I'm a bit lazy. Not true, of course!

Ben: Ha, ha! Just like my mum! I'm quite hard-working, but mum says I spend too much time playing computer games!

Hiro: Well we both like playing computer games then. Which one is your favourite?

Our teacher's multi-talented by Kenn Nesbit

Our teacher's multi-talented,
He's good at many things.
He paints impressive pictures,
And can juggle twenty rings.
He rides horses like an expert,
In this he has no faults.
He's also quite a gymnast,
Doing airborne somersaults.
He's something of a swimmer,
He's a champion at chess.
It's difficult to find a skill,
That he does not possess.
He speaks a dozen languages,
He's great at racing cars.
He's masterful at fighting bulls,
And studying the stars.
He's good at climbing mountains,
He can wrestle with a bear.
The only thing we wish he'd learn,
Is how to comb his hair.

Interviewer: What's your name?

Peng: I'm Peng.

Interviewer: How old are you?

Peng: I'm 11 years old.

Interviewer: What are your hobbies?

Peng: Well, I quite like skating, but I prefer playing the violin. I'm really shy though, so I don't play for other people very often.

2

Interviewer: Hi, what's your name?

Maria: I'm Maria.

Interviewer: How old are you?

Maria: I'm 12 years old.

Interviewer: Where are you from?

Maria: I'm from Mexico.

Interviewer: What are your hobbies?

Maria: I love playing basketball in the local park.

Interviewer: What are you like?

Maria: Well, I suppose I'm quite a generous, outgoing person, really.

3

Interviewer: Hello there! What's your name?

Brad: My name's Brad.

Interviewer: How old are you Brad?

Brad: I'm 11 years old.

Interviewer: What are your hobbies?

Brad: I'm crazy about surfing and because I live by the beach I can go every day. I'm really good at it!

Interviewer: What do your friends like about you Brad?

Brad: I suppose they think I'm cheerful and a confident person.

1

Doctor: Hello, Maria. What's the matter?

Maria: Well, my stomach hurts and I feel sick.

Doctor: How long has it been hurting you?

Maria: Since yesterday afternoon when I came back from my friend's party.

Doctor: What did you eat?

Maria: I ate a few sandwiches, some crisps and two large slices of chocolate cake.

Doctor: Hmm, well it sounds to me like you've got stomachache because you've eaten too much chocolate cake. You need to drink lots of water today and no chocolate!

2

Doctor: Hello Abdul. What seems to be the matter?

Abdul: My throat hurts and I've lost my voice.

Doctor: Yes, I can hear. Let's have a look at your throat. Say, arrr ...

Abdul: Arrr ...

Doctor: Yes, it's very red. Does it hurt when you swallow?

Abdul: Yes, it does.

Doctor: Well, you've got a very sore throat. You need to drink a lot of water and take this medicine twice a day.

3

Doctor: Hello Jess. What's wrong?

Jess: Well, I keep sneezing all the time and I've got a bad cough. My ear hurts, too.

Doctor: Do you feel sick?

Jess: No, I don't.

Doctor: Have you got a fever?

Jess: No, I haven't, but I've got a very blocked nose and I feel tired a lot. I have got no energy.

Doctor: OK, you have got a bad cold and also an earache. You need to keep warm, rest and drink lots of water. I'll give you some medicine for the earache.

Track 48

Kaya: Good morning everyone. My name's Kaya and I'm going to talk about why it is important to eat healthily.

Vegetables

We should eat fruit and vegetables every day because they give us vitamins and minerals which our body needs to work properly.

Grains and cereals

We should also eat grains and cereals such as pasta, rice and bread. These foods provide our bodies with carbohydrates, which give us energy.

Calcium

It is also important that we eat food that has a lot of calcium as this makes our bones and teeth strong. You can get calcium from dairy products such as milk, yogurt and cheese.

Protein

Foods that have protein are meat, fish and eggs. Some people are vegetarian and so they eat more vegetables, grains and nuts, which all have protein in them.

Finally, we can eat sweets, chocolates and cakes but you shouldn't eat them every day as they have a lot of fat and sugar, which is bad for our teeth and bodies.

Track 49

Once there was a young man who travelled around the country looking for work. Times were very hard and he had very little money. One day, feeling tired and hungry, he arrived at a small village. He thought that he might find someone who would give him some food.

He knocked at the door of a house. A woman opened the door. The traveller asked the woman politely for some food, but the woman answered that she had no food at all. The same thing happened at all the houses in the village. Nobody had any food!

However, the traveller had a plan. He knocked on the door of a big house and an old man answered. The traveller asked him if he had a large pot of water that he could use to make a big pot of soup for all the villagers. He was going to make it from a special stone he had found.

The old man helped the traveller build a big fire. The traveller took the stone and put it in the pot of water. As he cooked the soup, he said that the special soup was always better with a little onion and some cabbage to add extra flavour. So the old man gave him a bag of onions and some cabbage. The traveller added these ingredients to the soup.

A woman in the next house smelled the soup cooking. She went to see the traveller. He told her that the special soup was always very good, but that a little bit of meat, some carrots and some potatoes would add extra flavour. So the woman gave him a big piece of meat, a bunch of carrots and a sack of potatoes. These ingredients were also added to the soup.

A little girl also smelled the soup and spoke to the traveller. The traveller told the girl that the special soup was always very good, but it would be even better with a few beans and a pinch of salt and pepper. So, the girl gave him a bowl of beans and some salt and pepper and added them to the pot of soup.

Another woman came by after smelling the soup and she added a few mushrooms and some herbs to the soup.

After a while the soup was cooked and everyone had a bowl of delicious stone soup. No-one could believe that such a flavoursome soup could be made from just a stone and some water. The traveller served himself another bowl of soup and just smiled.

UNIT 9

Track 50

Boy: This is my city – Shanghai in China. It's on the East China coast and is one of the most crowded cities in the country. It's quite a noisy city but I love the colourful streets and the sound of busy people. It's very modern too with high-rise office buildings and amazing towers. There is also an ancient part of the city, which is very popular with tourists.

Girl: This is a photo of my village, Orta San Giulio in Italy. It is a beautiful, peaceful place located on the banks of the Orta lake. I love walking with my family and there are amazing mountains, forests and green hills – we often have picnics in the summer. It has a very small, pretty centre, which is very popular with tourists.

Track 51

Amina:

Part 1

I'm going to talk about my city, Dubai. These are two photos of Dubai, past and present. Photo A is a photo from many years ago. We can see the old houses and streets. There is also a balcony on the top floor of one of the houses. If you look closely you can see that there are no cars or street lights. I think I prefer these streets to roads today because they were quieter and safer!

Part 2

In the present day photo we can see a lot of differences. There are tall buildings and skyscrapers. There are also lots of cars driving down a big road. The streets are wider and busier than in the older photo. And there is a metro! I can move faster around the city by metro! I prefer modern Dubai. It's easier to travel around now because we have the metro. But I really like the old quiet streets.

Track 52

Amina: Many years ago, Emirati homes were very different from homes today. There was no electricity, so people cooked on stoves with oil or wood. There weren't any dishwashers to wash plates and pans; or microwaves to heat food quickly. Life was much more difficult than it is today. There were no televisions – imagine that! And no mobile phones! People washed clothes by hand because there weren't any washing machines.

The Lost City

Jassim and Hamad walked a long way.

'I'm getting tired,' Jassim said. 'Where are we going anyway?'

'We are going to find a city, a lost city. There are wonderful surprises for whoever finds the ancient city,' replied Hamad.

'Does anyone live there?' Jassim asked.

'Not anymore,' said Hamad.

'Why not?' asked Jassim.

'Because it's too far from all the modern cities and roads. In the past it was the busiest city in all of the Middle East,' replied Hamad.

'What kind of surprises are there? Good surprises?' Jassim asked.

'Beautiful surprises,' Hamad smiled. 'Come.'

'Are there date trees in the Lost City?' Jassim asked.

'A lot,' replied Hamad.

'Good. Let's hurry up then. I'm very hungry,' said Jassim.

Track 55

Hamad and Jassim continued their journey to the centre of the Lost City.

'This is where we shall find our surprise,' Hamad said.

When they reached the centre of the city, they found a huge, golden drum.

'Look at that!' said Jassim. 'Can I bang the drum?' he asked.

'Yes,' said his friend.

Jassim picked up a stick and hit the drum.

The drum was very loud. When the noise stopped, everything went very quiet. Then the crickets began to chirp.

'Listen,' Hamad said. 'It is beautiful.'

'When do we get the gold and silver?' Jassim whispered.

Hamad didn't answer him. He was listening to the beautiful music of the crickets.

The two boys stood quietly for an hour, until the crickets stopped singing.

'Our surprise?' Jassim whispered again.

'Jassim, that was our surprise. Nobody in the world has heard anything that beautiful before. It is our reward for our journey,' Hamad said.

'What about the gold and silver?' Jassim asked.

'We cannot touch those things. They belong to the people who once lived in this city. You can eat all the dates you want, but the rest must stay in the city,' Hamad explained.

When his friend mentioned dates, Jassim forgot all about the gold and silver.

'Dates!' he cried, and ran off to search for his prize.

UNIT 10

Track 56

I am a scientist! My job is very exciting. I work in a laboratory with other scientists, but sometimes I go out to hospitals. Why? Because I work with doctors and patients too. I find new ways to help doctors make their patients better. At the moment, I am working on something called a 'brain scan'. This is a picture of the patient's brain, inside their head. Imagine that! I want to find a way to make the pictures clearer. Then the doctors can find out quickly what is wrong with their patients.

My favourite part of the job is helping people. I feel very happy to know that my work helps people who are sick, and helps doctors to make them better.

Track 57

I am Dr Snore and I am a sleep scientist. I want to find out what happens when people don't get enough sleep. I study how people sleep in our sleep laboratory. Here's what happens.

At 8 o'clock in the evening, six people arrive to help with the experiment. We call them 'testers'. They stay all night in the laboratory.

First we ask them to do a test on the computer.

At midnight, the testers go to bed. We put special machines on them. These machines tell us how the testers are sleeping.

At 4 o'clock in the morning, the testers wake up. They do another test on the computer. After that, they can't go back to sleep!

At half past seven, the testers have breakfast together.

At a quarter to nine, they do another test on the computer. That's three tests so far!

For the rest of the day, the testers stay awake – they can't go to bed again until midnight. It's very hard for the testers to stay awake so long, but it tells me very useful information. We use the information to tell us how much sleep people need when they are working in important jobs, like doctors, nurses, firefighters and the police. It helps to make sure they are working safely.

Track 58

Girl 1: My name is Meera. The most important scientific invention for me is the Tablet computer. My dad works away in different countries most of the time. I can use my tablet to talk to him and to walk around the house showing him what I've been doing.

Boy 1: My name is Abeer. The most important scientific invention for me is new medicine. Last year my mum was very ill. The doctors gave her a new medicine they

were testing and it made her better. I want to be a scientist when I grow up.

Girl 2: My name is Muna. My favourite scientific invention is the solar panel. I live outside a small village in the desert and we use solar panels to make electricity for our house. We have a generator too, but it is noisy and smelly. The solar panels are quiet and clean and give us electricity for everything – even the TV!

Boy 2: My name is Ahmed. The most important scientific invention for me is lenses for my glasses. I am very short-sighted and without glasses I can't see much at all. With my glasses I can play football, see the board in the classroom and even make sure I get the right school bus.

Track 59

Man 1: I am Professor Walid. I study space. I am very clever and I have discovered three new stars. My students are sometimes lazy so I shout at them. They think I am rude and moody because I don't speak politely, but they just don't work enough!

Man 2: I am Professor Yasser. I study insects. I want to stop insects from eating the plants we grow for food. When the work is going well, I am the happiest man in the world. When things go wrong in the laboratory, though, it is terrible and I can be anxious and weepy. Solving scientific problems is the most important thing, so I worry a lot.

Woman: I am Professor Zainab. I study new medicines. I am a jolly person, but I'm hard-working too. I am very tough and like to make my students work hard. I have already thought of many new medicines to help others, which have been bought by medicine companies.

Track 60

Mr A: Right, boys. We will have a visitor to the class today. Can you help me to set up, Hassan and Faisal?

Hassan: Can I help you with those boxes, Mr Alhamli?

Mr A: Thanks, Hassan, can you put it over there?

Faisal: Can I open the boxes, Mr Alhamli?

Mr A: No, Faisal. Our visitor will open them when he arrives.

UNIT 11

Track 61

1
Alexander Graham Bell was a famous inventor who was born in Scotland. He changed the world with his invention! Do you know what it was? It was

the telephone! In 1876 he sent the first message by telephone. That was over 140 years ago!

2

Frida Kahlo was a famous artist from Mexico. When she was young, she was hurt in a very bad accident. But her terrible accident made her start painting ... and soon she was one of the most famous artists in Mexico.

3

Ahmed ibn Majid was an Arab explorer. He was born in 1421 in Julphar, the old name of Ras Al Khaimah. He sailed his first ship when he was only 17 years old. He was so famous that he was known as the first Arab seaman. He saw many new places and made maps to find the way.

4

Marie Curie was a famous scientist. She was born in Poland in 1867. She made medicines for people who were very sick. She was the first woman to win a very important prize for her work. Why was her work so important? Because today, her medicines are used in hospitals all over the world.

5

Steve Jobs was a very famous business person from the USA. Do you know why? He was one of the men who started Apple computers. Can you name some famous Apple products? Of course you can! Steve Jobs was the man behind the iPhone, the iPad and the iPod!

Track 62

Ed Viesturs was born in the United States in 1959. He is a famous American mountain climber and has climbed to the top of Mount Everest seven times.

Hayao Miyazaki is a Japanese film director and manga artist. He was born in Tokyo in 1941.

JK Rowling is a famous British writer. She was born in 1965 and she liked to write stories when she was a child. Her children's books are famous all over the world.

Track 63

Girl: Today, I am going to talk about my favourite footballer, Ismail Matar. I think he's amazing. He was born on 7th April 1983 in Abu Dhabi and he has two footballer brothers. He plays for Al Wahda football club and he's the captain of the UAE national team. At the age of 20, Ismail won the Golden Ball in an international competition.

Boy: For my presentation, I am going to talk about Jane Goodall. I think she is very interesting because her job is exciting. She is famous for her work with chimpanzees in Africa. She watched their actions, and discovered many interesting things about them.

She was born in England in 1934. She lived in London, and in the beautiful town of Bournemouth. When she was a child, she liked watching the animals and birds in her garden. Jane really wanted to travel to Africa to look at the animals that lived in the forests. When she was older, her dream came true and she worked with animals in Africa for many years.

I think she must be a very intelligent and caring person who loves animals very much.

Track 66

Part 1

One hot summer day, a merchant was walking down a country road when he came to a river. He thought, 'Why don't I cool myself in the water?' So he put his bag of money on top of some rocks and jumped into the water. How cool it was!

Suddenly he heard a noise behind him. He turned quickly and saw an eagle flying into the air with his moneybag in its claws. The bird probably thought the bag was something good to eat.

The merchant shouted. He jumped out of the water and shouted again. But the great bird was high in the air and flying towards the far away Black Mountains with all his money.

Part 2

After some time, the merchant went to the Ruler of the land because everyone loved him. 'Oh Ruler,' he said, 'I am so poor and I have lost all my money.' Then the merchant told him about the eagle flying to the Black Mountains with his moneybag.

So the Ruler asked all the men who lived in the Black Mountains, 'Do you know any person who was poor but who suddenly became rich?'

The men said that there was a gardener who was so poor that he had no clothes for his back or food for his family. But then one day everything changed for him and now he and his family dressed well and they had good food to eat.

The Ruler called the gardener and the merchant to his palace the next day.

Part 1

There once was a man who had a farm and two sons.

The man worked all day, but his sons were lazy and never helped their father.

When he saw all his beautiful trees dying because no one was taking care of them, he called his sons.

'My sons,' said the man, 'I am old. My farm is now yours.'

'Remember this: you will find a treasure in this farm if you look very hard.'

Part 2

The sons thought, 'The treasure must be gold! If we dig the land, we'll surely find it!' So they worked on the farm for days and days, looking for the treasure, but they found nothing.

The sons dug the land, and turned the soil, and the trees grew strong and beautiful. After a month of hard work, they went to their father. 'We have looked everywhere, but we haven't found any treasure.' 'My sons,' said the father, 'look at the farm. Can you see how beautiful the trees are after all your hard work? That is your treasure!'

Track 68

Last weekend, I went camping with my family. We drove from our house and went to the desert nearby. There were lots of great things to do – we talked with my family, played and had a barbecue and tea.

After we ate, I was talking with my sister when we heard a strange noise. We thought it was an animal – snakes and scorpions live in the desert. We stopped to listen but the noise stopped, but as we were talking again we saw something move in the sand near us. We were very scared and as we were looking for somewhere to hide, we heard someone laughing. It was just my little brother playing a trick on us!

STARS

High in the sky,
Late at night,
You can see stars
Shining bright.

They twinkle and shine
So far away,
But where do they go
In the light of day?

Like little dots,
High up above.
I wonder what
They are made of.

Are they just holes,
Out in the sky,
To make us wonder
Where and why?

I'd like to be,
Way up there too,
Just to get close,
How about you?

Speaker: Hello, my name's Talya and I live in Turkey. I live in a city called Istanbul. It's a very big and busy city. Ten million people live in this city and it has got the biggest seaport in Turkey. I live near my family and friends and I visit my grandparents a lot. They live in the old part of the city – their house is traditional and it's wooden. I love their house because it's big and old.

My friend Nadide lives in the city centre – I go to her house after school sometimes to do our homework. I like her house because it's very modern and comfortable, but I love my house the most because my bedroom is cool and we've got a football net in our garden!

I live outside the city in an eco-house, so it uses energy efficiently. We have solar panels on the roof to heat the house and to give us electricity. It's very modern and has big windows – my favourite room is at the top because there are big windows in the roof. I can watch the clouds in the sky.

Speaker 1: What would you like for lunch today, Pablo? We've got soup, pasta or salad to start. For the main course, there's chicken with rice and mixed vegetables or fish and chips with a green salad.

Boy: Hmm ... I'm not sure. I quite like soup. What kind of soup is it?

Speaker 1: It's carrot soup.

Boy: Oh, I don't like carrots very much! What's in the pasta?

Speaker 1: Sweetcorn, tuna, pepper and cheese.

Boy: Yum! I think I'll have the pasta then.

Speaker 1: And the main course?

Boy: I like both the chicken and the fish. The fish is with chips, isn't it?

Speaker 1: Yes it is.

Boy: Well, I'll have the fish then, please.

Speaker 1: For dessert, there's fruit or apple pie.

Boy: What kind of fruit is it?

Speaker 1: Pears.

Boy: Apple pie for me then, please. I don't like pears very much.

Track 4

Boy 1: Hi, Pablo, what did you have for lunch today?

Boy 2: I had some pasta.

Boy 1: Were there any vegetables in the pasta?

Boy 2: Yes, there were and there was some melted cheese too.

Boy 1: Hmm, delicious! What about the main course?

Boy 2: There wasn't any pizza today, so I had fish instead.

Boy 1: What about dessert? I didn't see any ice cream on the menu today and it's my favourite!

Boy 2: You're right – there wasn't. I'm not keen on pears, so I had some apple pie.

John: Hey, what's up? Oh, dear! What's the matter?

Ben: Nothing! Nothing at all!

Tom: Nooo ... nothing! We're great, aren't we?

John: No, you're not! I can tell ... I know what it is ... you're feeling nervous because you've got to go back to school tomorrow, aren't you?

Danny: No!

Tom: Well, actually, yeah ... you're right.

John: I thought so. Look, it's okay. Everyone feels like that the night before. I'm feeling a bit like that too ...

Ben: Really? But you're fourteen!

John: I know, but I still get that feeling even now.

Everyone does! Look, I bet there are loads of kids, all over the country, who are feeling exactly the same way today.

Danny: Do you really think so?

John: Of course! Kids everywhere get this feeling, whatever their age. It's just that no-one admits it! And it's not just kids ...

Ben: You mean ... ?

John: Yes! Even adults get it too. Dad told me once that even he gets a bit nervous before he goes back to work after a holiday. He said that he thinks about the great big pile of work waiting for him on his desk ... all the people he has to deal with ... And he's 42!

Ben: Well, I suppose it's normal to feel like this if even adults get it ...

Tom: And big brothers ...

John: Of course it is! Think of all the good things too – there are good things about going back to school, you know. Try to think of some!

Danny: Well, it'll be really good to see all our friends again. It's been ages since we've seen most of them.

Tom: And the football season starts when we go back!

Track 8

Hi, my name's Khalid. I'm from the UAE. I'm 11 years old and I live with my family: my mum, my dad and my little brother in Ras al-Khaimah. I play football and basketball for the school team.

I've got two best friends, Rashid who is in my class at school and my cousin Abdul Latif who I've known all my life.

What do people like about me? Mmm, well ... I suppose I'm quite outgoing and cheerful most of the time, so people think I'm fun to be with.

What do I like about me? Well ... I'm quite a tidy person.

I hate it if my bedroom gets messy. I'm also a generous person especially with my little brother!

What could I improve about me? Well, my family would say that I am very bad-tempered when I get up in the morning.

It's something I really need to change.

Doctor: Hello, Maria. What's the matter?

Maria: Well, my stomach hurts and I feel sick.

Doctor: How long has it been hurting you?

Maria: Since yesterday afternoon when I came back from my friend's party.

Doctor: What did you eat?

Maria: I ate a few sandwiches, some crisps and two large slices of chocolate cake.

Doctor: Hmm, well it sounds to me like you've got stomachache because you've eaten too much chocolate cake. You need to drink lots of water today and no chocolate!

2

Doctor: Hello Abdul. What seems to be the matter?

Abdul: My throat hurts and I've lost my voice.

Doctor: Yes, I can hear. Let's have a look at your throat. Say, arrr ...

Abdul: Arrr ...

Doctor: Yes, it's very red. Does it hurt when you swallow?

Abdul: Yes, it does.

Doctor: Well, you've got a very sore throat. You need to drink a lot of water and take this medicine twice a day.

3

Doctor: Hello Jess. What's wrong?

Jess: Well, I keep sneezing all the time and I've got a bad cough. My ear hurts, too.

Doctor: Do you feel sick?

Jess: No, I don't.

Doctor: Have you got a fever?

Jess: No, I haven't, but I've got a very blocked nose and I feel tired a lot. I have got no energy.

Doctor: OK, you have got a bad cold and also an earache. You need to keep warm, rest and drink lots of water. I'll give you some medicine for the earache.

Track 11

Kaya: Good morning everyone. My name's Kaya and I'm going to talk about why it is important to eat healthily.

Vegetables

We should eat fruit and vegetables every day because they give us vitamins and minerals which our body needs to work properly.

Grains and cereals

We should also eat grains and cereals such as pasta, rice and bread. These foods provide our bodies with carbohydrates, which give us energy.

Calcium

It is also important that we eat food that has a lot of calcium as this makes our bones and teeth strong. You can get calcium from dairy products such as milk, yogurt and cheese.

Protein

Foods that have protein are meat, fish and eggs. Some people are vegetarian and so they eat more vegetables, grains and nuts, which all have protein in them.

Finally, we can eat sweets, chocolates and cakes but you shouldn't eat them every day as they have a lot of fat and sugar, which is bad for our teeth and bodies.

Ahmed: Hi! I'm Ahmed and I live in Sharjah. One hundred years ago my city was very different to how it is today. In old Sharjah, families lived together around a courtyard. There were small houses – one for the older family members, and one for the younger family members. There was also a sitting room and eating area for everyone to meet and eat. But these houses didn't have proper kitchens or bathrooms, so I don't think life was very easy in the past. People walked around the city instead of going by car. Today there are thousands of cars on the city streets. In my opinion, we should walk more, because cars make the air dirty.

Nowadays, many families live in small apartment blocks. My apartment has all kinds of modern appliances. We've got a fridge, a microwave, a dishwasher, a television and mobile phones. I really like going out with my friends and we have lots of shopping malls and cinemas nearby, so there's lots to do in modern Sharjah. I think that living in Sharjah now is probably better than 100 years ago.

Dear Doctor,

I hope you and your family are well.

I have just read the new book by Ibn Nafis. It is about his idea of how the heart and lungs work together. Ibn Nafis's idea is one which will change medicine forever.

I will now change the way I look after many of my patients.

Would you like me to send a copy to you? I think we should discuss this great discovery.

Yours sincerely,

Doctor Yussuf al Harthi

Experiment 1:

Using a balloon to make sounds louder

Does the amount of air in a balloon change how well it makes sound travel?

Equipment:

4 balloons

Method:

1. Blow up the first balloon as big as you can.
2. Tap gently on a desk with your finger. How loud is it?
3. Hold the balloon close to your ear while someone taps gently. How loud is it?
4. Blow up balloon number 2 until it is half as big as the first balloon.
5. Hold the balloon close to your ear while someone taps gently. How loud is it? Is it louder or quieter than the bigger balloon?
6. Blow up balloons 3 and 4 as big as you can.
7. Press the balloons next to each other so they are touching.
8. Put your ear up to one balloon while someone gently taps on the other. How loud is it? Is it louder or quieter than one big balloon?
9. Record your findings. How loud would the sound be if the balloon was even bigger?
