Tips from students

Read the tips from students to help you understand how to get a good reading score.

Read the question carefully.

Read the extract two times:
1) Read the extract
2) Read the question and then read the extract whilst looking for the answer

If you don't know what any word means, read around the word to help you understand it properly.

Use your laptop so you can read the extract properly.

Read the sentences loudly if this helps you understand it.

Find the key words in the question.

Quickly answer the questions within the time limit set

Check every answer before you submit it because you can't go back to change it in this online exam.

What might an exam section look like?

A: Clocks in the past

The Egyptians used to use the pyramid and tall buildings to help them tell the time by using the shadow. This would be impossible to carry so they discovered the sundial in 1300BC. A sundial used the shadow that the sun creates to show the time. The sundial is similar to the hour hand on the clock. To see what time it was, people would find the shadow and wherever the shadow was, this told them what time it was. The Egyptians discovered that sundials were only helpful during the day because at night, there was no shadow. This is why the water clock was made because it worked even at night. Next, the candle clock was invented, then the hourglass.

B: Clocks in the present

We use mechanical clocks that were inspired by Galileo, who was 17, in 1581. The biggest problem that scientists had was inventing a clock which had a wheel that was smaller than a room that could turn at the same speed as Earth. Now, we use clocks that tell us how far the Earth has turned.

A prayer for exams...

اللَّهُمَّ لَا سَهْلَ إِلَّا مَا جَعَلْتَهُ سَهْلًا،
وَأَنْتَ تَجْعَلُ الْحَزْنَ إِذَا شِئْتَ سَهْلًا

Allahumma la sahla illa ma ja'altahu sahla,
wa 'anta taj-alul hazna idha shi'ta sahla

O Allah! There is nothing easy except
what You make easy, and You make the
difficult easy if it be Your Will

Good luck!
