There are five types of animation.

These are traditional animation, 3D animation, 2D animation, motion graphics and stop motion.

2D stands for two dimensional. The image looks flat and is not realistic. 3D stands for three dimensional the image looks realistic.

Traditional animation is the oldest type of animation.

3D computer animation is used the most. Motion graphics is different from the other types of animation. It is mostly used for logos and movie openings. Stop motion is the same as traditional animation. But a camera is used instead of drawing.
